D E F I N I T I O N S

Inventory, Supply and Disposition: Balance sheet estimates; the sum of inventory on hand beginning of year, births and inshipments equal the sum of marketings, farm slaughter, deaths and inventory on hand end of year.

Inshipments: Livestock shipped into States for feeding or breeding. Excludes livestock for immediate slaughter.

Marketings: Shipments to markets and slaughterers within the State, all shipments out of the State. Excludes interfarm sales within the State and farm slaughter. Number of head marketed includes all custom slaughter while live weight marketed excludes custome slaughter consumed on farms where produced except for 1965.

Farm Slaughter: Slaughter on farms. Excludes custom slaughter for farmers at commercial establishments except for 1965.

Production: Total live weight of livestock marketed, farm slaughter and custom slaughter consumed on farms where produced, minus live weight of inshipments, and plus the increase or minus the decrease in inventory live weight.

Price: State prices are annual prices computed by weighting monthly estimated prices received by farmers by monthly marketings; U. S. prices are derived by weighting State prices by marketings.

Cash Receipts: Receipts from marketings and sale of farm slaughtered meats.

Value of Home Consumption: Total value of slaughter on the farm and custom slaughter consumed on farms where produced.

Meat Animals

Revised Estimates, 1965-69

Farm Production, Disposition, Income

This publication presents revised estimates of the Crop Reporting Board, Statistical Reporting Service, by States, for farm production, disposition and income from meat animals for 1965-69. These estimates continue the official series on these data previously shown in "Meat Animals, Farm Production, Disposition and Income, by States, Statistical Bulletin No. 400, May 1967."

The revised State and U. S. series resulted from a thorough review of the original survey indications and estimates and taking into consideration 1969 Census of Agriculture data. Consideration was also given to records relating to market receipts and estimates of commercial and farm slaughter. The inventory estimates relate to January 1 of each year for cattle and sheep and to December 1 for hogs.

Revised estimates of numbers on farms and births were released in earlier publications. When revisions are made for the inventory numbers or births, corresponding adjustments are usually necessary in other items of the balance sheet. Because production estimates take into account the differences in inventory numbers and weights at the beginning and end of the year as well as pounds sold during the year, a revision of the inventory numbers, births or disposition items generally requires adjustments in production and income estimates.

Table 1. Meat Animals: Production and Income, United States, 1965-69 1/

Year	Production	Marketings	Value of Production	Cash Receipts	Value of home consumption	Gross income
	Million pounds		Million dollars			
1965	53,472	64,690	10,582	12,878	290	13,168
1966	55,348	65,709	12,612	14,932	336	15,268
1967	57,912	68,237	12,300	14,661	292	14,953
1968	58,716	69,363	12,773	15,356	293	15,649
1969	58,818	69,340	14,701	17,502	326	17,828

1/ Includes cattle and calves, sheep and lambs, and hogs.

TABLE 2. CATTLE AND CALVES:
INVENTORY, SUPPLY AND DISPOSITION, UNITED STATES, 1965-69 1/
