VEGETABLES - PROCESSING

ANNUAL SUMMARY

1974

Production of 13 processing vegetables grown commercially in the United States during 1974 totaled 12.5 million tons, a 10 percent gain over 1973 and 15 percent above 1972 tonnage. Production of 9 of the 13 processing vegetables estimated show increases over last year's output. Increases in aggregate harvested acreage and higher average yields per acre contributed to this year's larger production. Production excludes tonnage from mature crops not harvested because of economic factors.

A comparison of 1974 tonnage with 1973 by crops shows increases as follows: snap beans, up fractionally; beets, 20 percent; cabbage for kraut, 27 percent; green peas, 14 percent; spinach, 2 percent; tomatoes, 18 percent; asparagus, 6 percent; broccoli, 15 percent; and carrots, up one percent. Decreases in 1974 production from the previous year are: green lima beans, off 12 percent; sweet corn, 6 percent ; cucumbers for pickles, one percent; and cauliflower, 4 percent lower.

Value per ton was up 48 percent, reflecting sharply higher 1974 raw product prices. Combined value for the 13 crops, at $1,027.5 million, was 63 percent over the previous year. Larger acreages, increased yields and higher prices resulted in the 1974 record value.

LEADING PROCESSING VEGETABLE STATES IN 1974

RANK	ACREAGE HARVESTED 1/		PRODUCTION 2/		VALUE 2/	
	STATE	PERCENT OF U. S. TOTAL	STATE	PERCENT OF U. S. TOTAL	STATE	PERCENT OF U. S. TOTAL

1/ LIMA AND SNAP BEANS, BEETS, CABBAGE, CORN, CUCUMBERS, PEAS, SPINACH AND TOMATOES. 2/ SAME CROPS AS IN FOOTNOTE 1/ PLUS ASPARAGUS, BROCCOLI, CARROTS AND CAULIFLOWER.

This report includes the revised estimates for 1973 and preliminary estimates for 1974. The 1974 estimates are subject to revision in 1975.

Tabulations are based primarily on data provided by canners and freezers who voluntarily cooperate in providing basic statistics relating to their individual operations.
