Shelled Edible Grade Season to Date Utilization Up Less Than 1 Percent from Last Year

Peanut Stocks in Commercial Storage Totaled 5.35 Billion Pounds

Peanuts reported in commercial storage on December 31, 2021 totaled 5.35 billion pounds of equivalent farmer stock, compared with 4.39 billion pounds a year ago. This total includes 4.70 billion pounds of actual farmer stock.

Shelled peanuts on hand totaled 627 million pounds of farmer stock equivalent. Roasting stock totaled 23.9 million pounds.

Shelled peanut stocks totaled 471 million pounds of which 445 million pounds were edible grades and 26.1 million pounds were oil stocks. Edible grade stocks by type included 75.5 million pounds of Virginias and Valencias, 339 million pounds of Runners, and 31.0 million pounds of Spanish.

Millings in December totaled 469 million pounds. Millings by type were 67.5 million pounds of Virginias and Valencias, 384 million pounds of Runners, and 17.4 million pounds of Spanish.

Commercial processors utilized 203 million pounds of shelled edible grade peanuts during December. Utilization by type was 121 million pounds for all peanut butter products, 34.1 million pounds for peanut candy, and 42.3 million pounds for peanut snacks. Crushing for oil and cake and meal totaled 56.8 million pounds during the month.

Deliveries under the Government Domestic Feeding and Child Nutrition Programs amounted to 4.47 million pounds of peanut butter and 77.8 thousand pounds of roasted peanuts during December.

Stocks of treated seed on hand December 31, 2021 totaled 773 thousand pounds, compared with 773 thousand pounds on November 30, 2021. Of the December total, 106 thousand pounds were Runners. November stocks of treated seed included 106 thousand pounds of Runners.

Stocks estimates refer to December 31, 2021. All other data are for the month of December.

Statistical Methodology

Survey Procedures: The peanut stocks and processing estimates in this report are based on a survey conducted during the first three weeks of the month. The survey is required by law under Title 7 of the United States Code (7 U.S.C. 951, 2010). Peanut stocks are a census of all known cleaners, shellers, crushers, warehouses, cold storage plants, and processors of peanuts who handle more than 30,000 pounds annually. Every effort is made to obtain a report from all facilities.

Estimating Procedures: Since a complete report is not always received from all facilities, estimates are made for missing facilities to assure complete coverage. Peanut stocks survey data are reviewed at the national level for reasonableness and consistency with historical estimates.

Revision Policy: Peanut stocks are subject to revision at any time during the marketing year. Revisions can be made when late reports are received and errors are detected in reporting and calculating. Once the marketing year ends, no revisions can be made to the previous marketing year.

Reliability: The peanut stocks and processing survey is subject to non-sampling errors such as omission, duplication, imputation for missing data, and mistakes in reporting, recording, and processing the data. These errors cannot be measured directly, but are minimized through rigid quality controls in the data collection process and a careful review of all reported data for consistency and reasonableness.
