Direct Hay Weighted Average Report for week ending 10/22/2021

Volume		
This Week	Last Reported ( )	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Parts of the state received some showers at the beginning of the week, reducing the drought footprint again this week. The latest drought monitor showed only about 26 percent of the state impacted. Farmers are still hard at work to get crops out of fields. This week's crop progress showed 74 percent of corn and 30 percent of soybeans have been harvested. Monday's report showed 35 percent of the state's winter wheat has been planted and pasture condition is rated eighty percent in the fair to good category. Hay movement has been limited, as most have decent stockpiles. The supply of hay is moderate and demand is light to moderate and prices mostly steady. The Missouri Department of Agriculture has a hay directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/>
