Direct Hay Weighted Average Report for week ending 7/23/2021

Volume		
	This Week	Last Reported ()

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

A fairly quite week around the state. Temperatures have been warm but not at all unreasonable for late July. The sun has been shining about every day and those growing degrees are much welcomed especially in the north half of the state that has seen so much moisture on crops and pastures, some of which still have standing water in areas. The supply of hay is moderate and demand is light to moderate and prices mostly steady. The Missouri Department of Agriculture has a hay directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/>
