Direct Hay Weighted Average Report for week ending 2/26/2021

Volume		
This Week	Last Reported ( )	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

A much more pleasant week of weather throughout the state, as sun shine made temperatures climb. There was some small amounts of seeding and fertilizer spread in a few areas on top of the frozen ground the last couple of week. Although very few buggies have done any work yet there is some question of how much will be spread as prices have climbed since the first of the year and might provide some sticker shock to those that didn't pre-pay. As the days get longer many are counting how many feeding days they expect to be left. This is bringing a fairly decent amount of fair to lower quality round bales to the market as several look to move inventory before this year's crop season starts. Prices are steady and demand is moderate.
