Direct Hay Weighted Average Report for week ending 9/24/2021

Volume		
This Week	Last Reported ( )	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Much cooler weather came with the official arrival of Fall this week. Although a few warm days are still likely most folks enjoyed a break in the heat and pulling out the hooded sweatshirt or jacket once again. A few areas got a little rain this week but not really enough to add any water to the ponds in the isolated areas that are actually dry. Fall grain harvest is well under way and combines are rolling along good. Corn harvest likely passed the 25% mark this week and even a few fields of beans have been cut. . The supply of hay is moderate and demand is light to moderate and prices mostly steady. The Missouri Department of Agriculture has a hay directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/>

N/A						
Hay (Conventional)						

### Alfalfa - Supreme (Ask/Per Ton)

	<u>Qty</u>	<u>Price Range</u>	<u>Wtd Avg</u>	<u>Freight/Use</u>	<u>Description</u>	<u>Crop Age</u>
