Direct Hay Weighted Average Report for week ending 10/15/2021

Volume		
This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

This week is wrapping up with cooler temperatures and more moisture in the ground. Grass had a chance to green up after the couple days of rain and the warmer temperatures before the cold front headed through the state. The latest drought monitor showed about forty percent of the state impacted by some level of drought, a six percent improvement from last week's report. There have been a few reports of a little hay being fed, but there is still a moderate to heavy supply of hay, so there shouldn't be an issue finding some for now. Harvest progress, as of Tuesday's report, shows 64 percent for corn and 22 percent for soybeans has been completed. Hay prices are mostly steady.

N/A		
Hay (Conventional)		

Alfalfa - Supreme (Ask/Per Ton)

Qty	Price Range	Wtd Avg	Freight/Use	Description	Crop Age
Medium Square 3x3	200.00-250.00		F.O.B.
