2010 Wholesale Value of Floriculture Crops Increased 3 Percent

Value of All Production: The 2010 wholesale value of floriculture crops is up 3 percent from the revised 2009 valuation. The total crop value at wholesale for the 15-State program for all growers with $10,000 or more in sales is estimated at $4.13 billion for 2010, compared with $4.00 billion for 2009. California continues to be the leading State with crops valued at $1.01 billion, up 8 percent from the 2009 value. Florida, the next largest producer is down 1 percent from the prior year to $810 million in wholesale value. These two States account for 44 percent of the 15-State total value. For 2010, the top 5 States are California, Florida, Michigan, Texas, and North Carolina, which account for $2.75 billion, or 66 percent, of the 15-State total value.

Number of Producers: The number of producers for 2010, at 6,126, is down 7 percent in the 15 States compared with the revised 2009 count of 6,561. The number of producers with sales of $100,000 or more dropped 7 percent to 2,706 for 2010 from 2,918 in 2009.

Area Used for Production: In the 15-State program, total covered area for floriculture crop production was 725 million square feet. However, these data are not comparable with the 2009 revised area of 807 million square feet because the 2009 data was collected in conjunction with the Census of Horticultural Specialties and included area used for production of nursery crops as well as floriculture crops.

Peak Hired Workers: The average peak number of hired workers employed on operations in the 15-State program in 2010 is 18.3. A total of 4,826 operations hired workers during 2010. Overall, 79 percent of operations used some hired labor during 2010. The 2010 hired worker data are not comparable with 2009 data because the 2009 data was collected in conjunction with the Census of Horticultural Specialties and included labor hired for nursery production.

Production from Operations with Sales of $100,000 or More

Total Wholesale Value: The total wholesale value of floriculture crops sold by operations with $100,000 or more of sales in the 15-State program is $3.98 billion for 2010, up 3 percent from the revised 2009 total. These operations account for 96 percent of the total value of $4.13 billion in floriculture crops, but comprise only 44 percent of all producers. California accounted for 25 percent of the total wholesale value in the 15 States. Florida ranks second with 20 percent; while Michigan, Texas, and North Carolina round out the top 5 States accounting for 10 percent, 7 percent, and 6 percent of the total, respectively.

Bedding/Garden Plants: The wholesale value of bedding and garden plants, which include herbaceous perennials, at $1.91 billion, is up 4 percent from the previous year. This is the largest contributor to value of sales and represents 48 percent of the wholesale value of all the reported crops. California, Michigan, Texas, North Carolina, and Ohio, the top 5 States in this category, account for 57 percent of the total 15-State bedding and garden value. The number of growers producing annual bedding and garden plants is 1,666, down 8 percent from 2009.

Potted bedding and garden plants, both annuals and perennials, are valued at $1.19 billion for 2010, up 5 percent from 2009. This value represents 62 percent of the bedding and garden category. Potted **annual** bedding and garden plants are valued at $640 million, up 7 percent from the revised 2009 valuation.

Potted herbaceous perennials are valued at $553 million for 2010, up 3 percent from 2009. These crops account for 29 percent of the bedding and garden category value. The number of growers producing herbaceous potted perennial plants is 1,353, five percent fewer than in 2009.

The value of **annual bedding and garden flats** is up 3 percent from a year earlier to $510 million. Flats represent 27 percent of the total value for bedding and garden plants.

Flowering hanging baskets account for $209 million in wholesale value, up 1 percent from 2009. Hanging baskets account for 11 percent of the total bedding and garden value.

Potted Flowering Plants: Potted flowering plants for indoor or patio uses are valued at $669 million, up 4 percent from 2009. California accounts for 36 percent of the 15-State value in this category, and Florida accounts for 17 percent. The value of Potted Orchids is $171 million, up 6 percent from the previous year. Other crops in this category with increased values include African violets, spring flowering bulbs and florist roses. The number of potted flowering plant producers decreased by 10 percent to 1,133 in 2010.

Foliage Plants: The value of 2010 foliage plant sales, at $571 million, is up 3 percent from the previous year at the 15-State level. Florida continues to dominate this category with 72 percent of the value. Potted foliage plants represent 87 percent of the total foliage value. The remainder of the value is from hanging baskets. The number of foliage plant producers decreased 2 percent to 858 in 2010.

Cut Flowers: The wholesale value of domestically produced cut flowers is $375 million for 2010, 4 percent more than 2009. California's value is $286 million, accounting for 76 percent of the total cut flower value in the 15-State program. In 2010, the number of producers dropped to 316.

Cut Cultivated Greens: Cut cultivated greens wholesale value for 2010, at $78.3 million, is up 6 percent from 2009. Florida's value, at $60.7 million, represents 78 percent of the category total. The number of producers for 2010, at 161, decreased 6 percent from the previous year.

Propagative Floriculture Materials: Total value of sales of material for propagating annual bedding and garden plants, potted herbaceous perennials, potted flowering plants, foliage plants, cut flowers, and cut cultivated greens is $376 million for 2010, down 1 percent from the previous year. The three leading States, Florida, Michigan, and California, account for 60 percent of the 15-State total.

[1] Wholesale value of sales as reported by operations with $100,000 or more in sales of floriculture crops plus a calculated wholesale value of sales for operations with sales below $100,000. The value of sales for producers below the $100,000 level was estimated by multiplying the number of producers in each size group by the mid-point of the sales range.

Survey Definitions

Floriculture Crop: Any item considered in the categories of annual bedding and garden plants, potted herbaceous perennials, potted flowering plants for indoor and patio use, foliage plants for indoor or patio use, cut flowers, cut cultivated greens, and propagative floriculture materials.

Commercial Producer: Any operation which produces any floriculture crops in the categories listed above and where gross floriculture crop sales total $10,000 or more during the calendar year.

Area Used for Production: Greenhouse, other covered space, and outdoor area used for the production of floriculture crops. Walkways and aisles are included. Multiple uses of the same area are counted only once, without counting crop turns. Covered area includes glass, rigid plastic and film plastic greenhouses, and shade houses. The area published for 2009 includes nursery production area as well as floriculture production area.

Quantity Sold: Represents both retail and wholesale sales in the calendar year shown. Floriculture crops purchased from others for immediate re-sale are excluded. Bedding plant flats are converted to the standard 11-inch x 22-inch flat size.

Expanded Wholesale Value: Value of all floriculture crops grown, at wholesale, for operations with sales of floriculture crops of $10,000 or more. This figure is the sum of the wholesale value of sales as reported by operations with $100,000 or more in sales and the estimated value for operations with sales between $10,000 and $99,999. The value is derived by multiplying the number of producers in each range of sales by the mid-point of the range.

Value of All Sales at Wholesale: Equivalent wholesale value of all sales. It is derived by multiplying the average wholesale price by the total quantity sold (both retail and wholesale). Wholesale prices are on a gross basis before deductions for sales commissions, transportation charges, or other similar deductions.

Survey Procedures

The floriculture statistics presented in this publication are compiled from interviews of all known growers of floriculture crops in the 15 program States. Producers must have annual gross sales of all floriculture crops of $10,000 or more, to be included in this report.

These results are based upon the Commercial Floriculture Survey questionnaire, a copy of which is included on the following pages of this report. During the collection of 2010 data, previous year information was sometimes updated. Additionally, in order to maintain comparability within the 15-State program, data for 2009 and 2010 were collected, where appropriate, from any new operations discovered through ongoing list building activities. Operations are classified by summing the value of actual plant sales reported in the questionnaire. This lessens the possibility that sales of non-floriculture plant material may be included.

The data in this report for annual bedding and garden plants, potted herbaceous perennials, potted flowering plants for indoor or patio use, foliage plants for indoor or patio use, cut flowers, cut cultivated greens, and propagative floriculture materials are summarized only from growers with $100,000 or more in annual sales. The data summarized in tables showing grower numbers, hired workers, and growing area represent all growers having sales of $10,000 or more. The area and labor statistics will not be comparable between the two published years as they will include nursery production area and labor for 2009 due to combined data collection efforts with the 2009 Census of Horticulture.

The Department of Agriculture is conducting its annual Floriculture Survey to collect data on 2010 production. Your cooperation is essential. Completing this survey may help you identify areas of profit and plan for the new growing season. It will also help us to accurately estimate floriculture production in your State, and nationally. Your response is voluntary. The information you furnish will be kept confidential, as required by law.

Please make corrections to name, address and Zip Code, if necessary.
