Vegetables: Final Estimates by States, 1992-97, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service, Statistical Bulletin No. 946.

Introduction: This bulletin presents final estimates, including revisions made by the Agricultural Statistics Board (ASB), for the production years 1992 through 1997. Acreage, yield, production, price, and value data were published during calendar years 1993-98 in periodic ASB reports. Data included in this publication provide a historic record and a benchmark for current estimates.

Procedures: Revisions were made after a thorough review of the original survey data and all additional data now available, including the 1997 Census of Agriculture. Other data considered included marketing agreement records, recorded truck and rail movement, quantities inspected, and quantities used by processors. The current acreages were evaluated with historic totals to ensure comparability with past Census relationships. The 1992-97 estimates shown herein are considered final and will not be revised again.

Most of the data in this Statistical Bulletin were revised from earlier published levels. The most significant revisions were made to the 1997 crop. Where necessary, data for earlier years were also revised. Shown below are the revisions at the National level for the major commodities that have multiple States in their respective programs.

Electronic Publications: These bulletins will be available **FREE OF CHARGE** on the Internet from the NASS Home Page at: <http://www.usda.gov/nass/>, in either text or PDF format. From the Homepage select "Historic Data," then "Statistical Bulletins."

Internet Published Estimates Data Base: Selected historical State and U.S. information is now available in an online data base via the Internet **free of charge**. County information will be available by mid 1999. The database allows custom extracts based on commodity, year, state and other selection criteria and produces an output file compatible for updating databases and spreadsheets. The database can be accessed from the NASS Home Page at: <http://www.usda.gov/nass/>.

Printed Copies: Printed copies of the bulletins may be ordered by calling the Sales Order Desk toll free at 1-800-999-6779. Costs for printed copies of the publications range from \$15.00 to \$20.00. Visa, MasterCard, check, or money order are acceptable for payment.

Agricultural Census Publications: The Volume 1, Geographic Area Series publication containing the United States Summary provides National data and selected data for each State. Separate State reports present statistics for the entire State and each county. Census reports cover the 1997 production year, with comparative data for earlier census years. The 1997 Census of Agriculture Geographic Area Series products, including all manipulable data files and Adobe Acrobat (PDF) files of the printed reports, will be available on March 20, 1999 via the Internet at <http://www.usda.gov/nass/>. The information is also available on CD-ROM, and in printed publications. Printed copies of the Census publications and CD-ROM's may be ordered by calling the Sales Order Desk toll free at 1-800-999-6779.

Assistance: For more information pertaining to this bulletin call Crops Branch at (202) 720-2127. WEIGHTS and MEASURES

The following table on weights, measures, and conversion factors covers the vegetables in this report. It does not cover all containers for any one product.

The information has been assembled from State schedules of legal weights, various sources within the U.S. Department of Agriculture, and other Government agencies. For many vegetables, there is a considerable variation in weight per unit of volume due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weight. The table was prepared chiefly for use of workers in the U.S. Department of Agriculture who have need of conversion factors in statistical computations.
