ANNUAL REPORT ON TOBACCO STATISTICS, 1959

**Prepared by the
Tobacco Division**

This is the twenty-fourth in a series of annual reports on tobacco statistics authorized and requested by Congress on August 27, 1935. The report is a compilation of the most frequently used statistics relating to tobacco. Most of the data covers only the last five years; averages are included for earlier periods in some instances. Data covering longer periods may be found in the report for 1947.

TOBACCO

BRIEF RESUME FOR 1959 AND OTHER FACTORS RELATING TO U. S. TOBACCO INDUSTRY

Production

United States tobacco growers harvested a crop of approximately 1,800 million pounds in 1959, up about 4 percent from 1958 and 8 percent from 1957. Although 1959 production was somewhat larger than during the previous two years, it was considerably smaller than most crops in recent years. Acreage allotments under the Marketing Quota program were reduced rather sharply beginning with the 1957 crop and have remained at approximately the same level for the past two years. However, part of the allotted acreage was placed in the acreage reserve of the Soil Bank program in 1957 and 1958, and since this program was discontinued after 1958, some of this acreage was returned to production in 1959. The average yield per acre realized by U. S. tobacco growers was down slightly in 1959 from the record 1958 level (1,611 pounds), but still ranked third highest on record (1,596 pounds in 1956). Although there have been yearly fluctuations, tobacco yields per acre have shown a substantial upward trend during the past 20 years with yields at present more than 80 percent greater than the average for the 1934-38 period. The 1959 harvested acreage is estimated 1,154 thousand acres compared with 1,078 thousand for 1958. This acreage is substantially lower than a few years earlier, but higher yields have to a considerable extent balanced the lower acreage.

1959-60 Auction marketing season

Table A below shows sales and average prices for the 1959 crop with comparisons for the 1958 crop for those types sold at auction (Maryland markets do not open until about May 1, 1960, for sales of 1959 crop).

Flue-cured

Flue-cured tobacco is the principal kind grown in the United States (about 60 percent of total production) and is used primarily in cigarettes. Demand was relatively strong during the 1959-60 marketing season for flue-cured, and prices reached record high levels for many grades. The 1959 flue-cured crop was considered a very usable one for cigarettes, although containing a proportion of better quality grades that was below normal. Buying by domestic cigarette manufacturers was greater than from the previous two crops. Domestic cigarette manufacturers purchased from the 1957 and 1958 crops considerably less than usings and thus, entered the 1959 buying season with lower inventories of flue-cured leaf. About 35 to 40 percent of the flue-cured production is normally exported, and the export buyers were a factor in the strong market during the past season. With the stronger demand in 1959, only 5.2 percent of the flue-cured crop was received under the price support loan program (13.4 percent in 1958).

Burley

Burley is the second most important domestic type (28 percent of total production), and also is used largely in cigarettes, although a significant quantity is used in smoking and chewing products. The 1959 crop contained a very high proportion of nondescript and other lower quality grades, and this tended to depress prices to a limited extent on the poorer qualities. Nevertheless, the spread in prices between the top and bottom grades continued relatively narrow although somewhat greater than during the previous season. While prices were lower on some qualities

Source: Compiled from records of the Tobacco Division, AMS.

during the past season in comparison with the previous season, all grades averaged well above their respective loan levels and only 2.6 percent of sales was received under loan. (2.4 percent in 1958). The overall average as shown in table A dropped nearly 6 cents per pound, compared with the previous year, with poorer quality being more significant than lower grade prices.

Exports account for 6 to 7 percent of burley disappearance, which is an important factor in the market demand but not to the extent as for flue-cured. Exporters to markets where price is a major consideration were able to purchase a higher percentage of the 1959 burley crop than other recent crops because of the large proportion of lower priced grades.

Fire-cured and dark air-cured types

Fire-cured tobacco currently accounts for approximately 3 percent of the total U. S. production. About one-half of the production is used domestically and the other exported. Snuff is the principal domestic outlet but a limited amount goes into Toscani type cigars and chewing tobacco. Our export customers use fire-cured leaf mainly for snuff, smoking tobacco, and cigars. Dark air-cured tobacco production amounts to only slightly over 1 percent of the U. S. total. Domestic consumption accounts for about two-thirds of the disappearance, principally in chewing tobacco, but limited quantities in other products such as smoking tobacco and snuff.

The trend in consumption for many years, both in the U. S. and abroad, has been towards the milder, lighter types of tobacco and away from the fire-cured and dark air-cured kinds. Although production has been curtailed drastically, the growers of the dark types have been faced with a chronic over-supply problem. Prices by grades generally are within a very close range of their respective price support advances. In 1958, the demand was relatively good for Kentucky and Tennessee dark air-cured tobaccos, types 35 and 36, but weakened again during the past marketing season following a somewhat larger crop. The market for Virginia fire-cured tobacco improved in 1959 after a relatively depressed 1958 season when a very poor quality crop was marketed. Virginia sun-cured tobacco is the only dark type where the demand is relatively good each year.

Carryover stocks of U. S. grown leaf tobacco

Shown below are the total carryover stocks in the hands of U. S. tobacco dealers and manufacturers as of the beginning of the market year, broken down according to quantities held by domestic manufacturers, under price support loans, and by dealers.

TABLE B. --Total carryover stocks of U. S. grown tobacco, 1950-59

1958.....	2,741.6	999.5	422.6	4,163.7
1959.....	2,647.3	957.9	367.9	3,973.1

Source: Tobacco Division, AMS.

Tobacco dealers and manufacturers report inventory stocks of leaf tobacco quarterly to the Tobacco Division, Agricultural Marketing Service, with the stocks segregated according to U. S. types. Figures in Table B are the combined total of stocks of all types of U. S. grown tobacco. This breakdown was published in the October 1, 1959, Tobacco Stocks Report, by separate types of tobacco.

The carryover inventories of 3,973 million pounds in 1959 were substantially lower than those of two years earlier when they reached an alltime peak. A sizable reduction is expected again in 1960. Production of the tobacco in the U. S. was curtailed rather sharply beginning with the 1957 crop, as a result of acreage reductions under the Marketing Quota and Soil Bank programs. Of the 1959 carryover stocks, 958 million pounds were under price support loan, or slightly under the 1957 peak level (1,028 million pounds). The loan holdings probably will be reduced at least one-third by 1960, as considerable quantities of loan stocks have been sold since the beginning of the current marketing year. A large part of these purchases of loan stocks during the current year will be by domestic manufacturers to maintain normal leaf inventories to meet their manufacturing requirements.

Leaf tobacco utilization in the United States

The following table shows an indicated total utilization of leaf tobacco in the United States, segregated according to U. S. grown leaf and imported tobacco. The imported leaf has been converted to an unstemmed equivalent for comparability between years, as varying quantities are imported in a stemmed and scrap form.

TABLE C. --Approximate leaf tobacco utilization in the U. S., averages 1934-38 and 1949-53, annual 1952-53 to 1958-59¹

Marketing year	U. S. grown tobacco	Imported leaf ²			Total utilization	Percent age imported
		Cigar	Cigarette	Total		
	<i>Mtl. lb.</i>		<i>Mtl. lb.</i>		<i>Mtl. lb.</i>	<i>Percent</i>

1958-59	1,417	47	110	157	1,574	10.0

¹ Domestic leaf on farm-sales-weight basis; imported converted to unstemmed equivalent.

² Imports for consumption, fiscal year basis.

Domestic manufacturers are not required to report utilization of leaf tobacco for tobacco products. The Internal Revenue Service formerly secured information on total leaf utilization, but this reporting was discontinued several years ago. The indicated consumption of U. S. grown tobacco, shown in Table C, is a derived figure based on the changes in the overall level of leaf tobacco inventories (see table 1 beginning on page 9).

The indicated utilization of domestic types is currently considerably below the peak year of 1952-53, despite the substantially higher output of cigarettes and cigars at present. Cigarettes are our most important product, currently accounting for about 80 percent of the total utilization of leaf tobacco in the U. S. The average leaf requirements for a unit of output of cigarettes

Source for tables on this page: estimates of Tobacco Division, AMS.

has been reduced rather substantially during the past 5 years. This is the principal reason for the lower leaf usage.

Tables D, E, and F show estimates of the amounts of leaf used in cigarettes by domestic manufacturers, segregated by types of tobacco and the average quantity per thousand cigarettes. Table D shows estimates of the breakdown of domestic disappearance between cigarettes and other products for flue-cured, burley, and Maryland types of tobacco. The quantity for other products is mainly for use in smoking and chewing, but small quantities of flue-cured and Maryland are used as cigar filler, and a considerable part of the "other" under Maryland is for this purpose. Table E shows the estimated quantity of leaf used for cigarettes, segregated by types of tobacco. As shown by Table F, the average domestic leaf used per thousand cigarettes has decreased about one-half pound per thousand cigarettes in a very short period of time.

Cigarette output during 1958-59 was approximately 10 percent higher than during 1952-53, the peak year of utilization of leaf in cigarettes. However, the estimated amount of domestic leaf used dropped from 1,257 million pounds to 1,147 million during the period, a decrease of about 9 percent. Prior to this downturn, the amount of leaf used per thousand cigarettes had remained relatively constant with only minor fluctuations. The downturn in utilization has been fairly proportional between flue-cured and burley leaf, the principal domestic types used in cigarettes.

There are several causes for this lower leaf utilization per unit of output of cigarettes. The principal ones are (1) reconstituted tobacco, which allows more complete utilization of the leaf as it enables manufacturers to recover small particles of leaf, and also stems can be used in the sheet; (2) filter-tip cigarettes, which require less tobacco because the filter replaces part of the tobacco; and (3) a slightly higher proportion of imported leaf (aromatic or Oriental) in the average cigarette.

In connection with leaf utilization in cigars, the use of homogenized or reconstituted tobacco sheet has made significant inroads on the leaf requirements for binder purposes. Also, the greater use of imported cigar filler has been paralleling the increased output of cigars in recent years. The dimensions of cigars are smaller, which reduces the overall leaf requirements per unit of output.

Tobacco Products

Expenditures for tobacco products in the U. S. were about 7 billion dollars in 1959 for a 9 percent increase over 1958 (6,376 million). Consumers paid slightly higher prices for cigarettes during the past year on an average, as the result of increases in tax rates in a number of States, and filter-tip cigarettes accounted for the increased consumption and these are slightly higher priced than the non-filter brands. Prices for smoking and chewing products were also higher. Tax-paid removals of cigarettes increased to a record level of 454 billion in 1959, representing a 4 percent increase over 1958 (436 billion). This substantial increase followed an even greater increase in removals in 1958 over 1957 (up 6.6 percent).

Per capita consumption of cigarettes in the U. S. reached the record level of 3,723 cigarettes, up 2.6 percent over 1958, and continues the substantial up-trend of the past 5 years. The increase in the per capita rate was 2.4 percent in 1955; 1.8 percent in 1956; 3.0 percent in 1957; and 5.1 percent in 1958. Important factors leading to this increase are the higher average rate of smoking among filter-tip cigarette users, and an increasing percentage of women smokers, in addition to the general economic well-being of the

average consumer. Per capita personal disposable income reach a new record high level during 1959.

Cigar consumption has made significant gains for the second consecutive year, registering a 7.3 percent gain in 1959 after a 4.6 percent gain in 1958. Taxpaid removals of cigars in 1959 at 6.9 billion was the highest level since the early 1920's. More intense sales promotion by cigar manufacturers and the production of cigars in the lower price range are significant factors in the higher consumption. The proportion of cigarillos has grown to about 15 percent of total consumption and most of these sell at around 5 cents each. Also, new lines of cigars have been introduced to sell at 8 cents each or slightly less, which is an important factor in the gain in the Class D cigars as shown in the table below.

TABLE G. --Percentage of large cigars removed tax-paid, by price classes, and total removals, 1954-59

Class	Calendar year

Leaf Tobacco Exports

Exports account for slightly more than one-fourth of annual disappearance of U. S. grown leaf. Exports during the past year at 526.1 million pounds (farm-sales-weight) were at lowest levels in several years, although still a very substantial quantity. Principal reasons for the decrease were (1) increased competition from foreign production, (2) higher prices of U. S. grown leaf, and (3) trade barriers by foreign countries which limit or sometimes preclude the importation of U. S. tobacco. As shown by the table below, flue-cured tobacco is by far our most important export type, accounting for 80 percent of exports in 1959, about the same proportion as during most other recent years. Also shown is the importance of each major classification in the overall leaf tobacco exports.

TABLE H. --Percentages of exports of unmanufactured tobacco, by specified groupings and total volume exported, calendar years, average 1935-39, annual 1956 to 1959

¹ This table is on a crop-year basis for 12 months beginning as follows: Types 11-14 and 61-62, July 1; all other types, October 1. These crop years begin before any of the new crop for the current year has entered stocks. Disappearance for any crop year is the sum of the stocks at the beginning of the year plus the current crop minus stocks remaining at the end of the crop year. Exports are on a farm-sales-weight basis. Domestic disappearance is total disappearance minus exports, and includes leaf used by manufacturers in the United States, losses or wastage, and differences which may result from errors in estimates and conversions of weights. ² Preliminary. ³ Includes type 24 production through 1949; disappearance through 1951. ⁴ Includes type 45 production through 1939; disappearance through 1940.

⁵ Puerto Rican type 46 production is that which is planted in the fall of the crop year shown and harvested the following spring. Stocks consist of holdings in the United States and on the Island of Puerto Rico. Stocks on the Island estimated prior to 1936. ⁶ Less than a 5-year average. ⁷ Includes type 56 production from 1936 through 1948; disappearance through 1951. ⁸ Includes type 65 for 1929.

Production and price statistics (except Puerto Rican) compiled from reports of the Agricultural Estimates Division, AMS (Puerto Rican from reports of the Bureau of Agricultural Economics of Puerto Rico); stocks from reports of the Tobacco Division, AMS; and exports from reports of the Bureau of the Census, U. S. Department of Commerce.

¹ A two-thirds majority of farmers voting is required to place marketing quotas in effect. Legislation approved in August 1955 required that voting be for a 3-year period only. ² Redetermined quota for Burley for the 1955 crop. ³ Fire-cured (21-24) and dark air-cured (35-36): Referendums for both kinds combined for the crops of 1938 and 1939; quotas for the 1943 crop terminated August 14, 1943; and quotas were not in effect for the crops of 1944 and 1945.

¹ Information in this table taken from U. S. Department of Agriculture Circular 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937.

² Factors for converting unstemmed stocks to farm-sales weight are adjusted on the basis of an average loss on the reported weight and should not be taken as indicative of full shrinkage after handling, sweating, and storage.

³ The general instructions for filing the tobacco stocks reports require dealers and manufacturers to indicate the weight basis on which stocks of unstemmed cigar leaf of the domestic types are reported, namely, farm-sales-weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amounts reported in these three categories.

⁴ Foreign-grown stocks not converted to farm-sales weight equivalent.

TABLE 7. --Stocks of leaf tobacco, by types, as reported and on a farm-sales-weight equivalent basis, owned by dealers and manufacturers in the United States and Puerto Rico, by quarters, 1954-59

¹ Includes Types 70 (low nicotine), 72, 73, and 77. Also includes Type 31-V (low nicotine). Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

Compiled from quarterly Tobacco Stocks Reports, Tobacco Division, AMS. Consult the reports for further detailed information.

Compiled from Tobacco Market Reviews, Tobacco Division, AMS.

TABLE 11.--Hogshead dimensions and weights, by class or type of tobacco

Class or type of tobacco	Diameter	Length	Average weight	
			Net	Tare
Flue-cured.....	Inches 48	Inches 48	Pounds 950	Pounds 135
Burley.....	48	54	1,000	145
Virginia fire-cured.....	48	54	1,350	150
Kentucky and Tennessee fire-cured.....	48	54	1,500	190
Dark air-cured.....	48	54	1,250	175
Maryland.....	47	52	750	140

Note: These figures are weights and dimensions of hogsheads that are usually purchased by the trade in "knocked down" form and are assembled as used. Some manufacturers use the so-called patented or collapsible hogsheads, usually 47 by 54, the tare weight of which is 115 pounds.

¹ The number of days on which sales were held. The regular auction sales week is Monday through Friday and is generally observed on the majority of markets.

² This market sells more than one type of tobacco and is listed under each type sold.

³ Same buyers used for two or more markets as follows: Type 31 - Bowling Green, Franklin, and Russellville, Ky., two sets (in addition to one full set at Bowling Green); Louisville, Ky., and New Albany, Ind., two sets; Mayfield and Paducah, Ky., one set; Athens and Sweetwater, Tenn., one set; Columbia and Mt. Pleasant, Tenn., one set; Type 35 - Franklin, Mayfield, Murray, and Russellville, Ky., and Springfield and Westmoreland, Tenn., two sets.

⁴ Same buyers used as for dark air-cured (Type 36), at Henderson, Ky.

⁵ Sales of Southern Maryland occur in the year following production.

Compiled from Tobacco Market Reviews, Tobacco Division, AMS.

Grand total ³	1,448,453	3,445,111	4,893,564	4,138,742	754,822	--	--

¹ Includes all disposals through November 30, 1959.

² Includes 70,187 thousand pounds, net packed weight (78,416 thousand pounds green weight), representing quantities purchased for British manufacturers, which they have since bought and shipped.

³ Total does not include quantity of 1959 crop of flue-cured tobacco.

⁴ Not available on a green-weight basis.

⁵ Price support not in effect for 1951, 1952, 1954, and 1955 crops because growers disapproved market quotas.

⁶ Includes Puerto Rican filler, type 46. Percentages are calculated on total cigar-leaf production basis.

Compiled from official records with respect to Commodity Credit Corporation operations and Tobacco Division, CSS.

¹ Loan levels as shown indicate availability of loans, whether a program was in operation or not. Loan levels are based on 90 percent of the parity price, with the following exceptions: Fire-cured and dark air-cured classes, set at 75 percent and 66-2/3 percent respectively of the Burley loan rate, but beginning in 1958, not to exceed the 1957 levels; unless 90 percent of their respective parities exceeds such levels; types comprising the filler and binder group, which are adjusted-type differentials based on the parity price for the group; Maryland and the cigar filler and binder types in 1950, which were 86 percent of parity; loan rates as shown for the 1952 to 1955 crops (excepting Puerto Rican) are minimum levels as announced in March, which were higher than 90 percent of parity as of the beginning of the marketing year (according to legislation, loan levels shall be the higher of the two); Puerto Rican 88 percent of parity in 1955, and 89 percent in 1956.

² The marketing year begins as of July 1 for flue-cured and cigar wrapper, and October 1 for all other types.

³ Announced "no support." Growers disapproved quotas.

⁴ Includes type 46 through 1950.

⁵ Beginning in 1951 type 46 is a separate kind of tobacco.

⁶ Mandatory loans not applicable.

Cigarettes weighing more than 3 pounds per 1,000.....	² 7.20	² 7.80	² 8.40	
Weighing not more than 3 pounds per 1,000.....	3.00	3.25	3.50	³ 4.00
Manufactured tobacco and snuff.....	⁴ .18			⁴ .10
Cigarette papers (in books or sets of more than 25).....	⁵ .005			
Cigarette tubes.....	⁵ .01			

¹ Dates of acts (and when effective) are as follows: Feb. 26, 1926 (Mar. 29, 1926); June 25, 1940 (July 1, 1940); Oct. 21, 1942 (Nov. 1, 1942); and Oct. 20, 1951 (Nov. 1, 1951).

² Except that if more than 6-1/2 inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per 1,000, counting each 2-3/4 inches, or fraction thereof, of the length of each as one cigarette (Revenue Act of May 10, 1934).

³ The Revenue Act of Oct. 20, 1951, increased the rate on small cigarettes to \$4.00 per 1,000 (8 cents per pack). The increase was scheduled to terminate on Apr. 1, 1954, and the rate revert to \$3.50 per 1,000 (7 cents per pack). Under subsequent acts, however, the rate increase has been extended to July 1, 1960.

⁴ Rate per pound.

⁵ Rate for each 50 or fraction thereof; except that if papers or tubes measure more than 6-1/2 inches in length, they shall be taxable at the rate prescribed, counting each 2-3/4 inches, or fraction thereof, of the length of each as one paper or tube (Revenue Act of May 10, 1934).

¹ The Philippine Trade Agreement Revision Act of 1955, Public Law 196, 84th Congress, approved August 1, 1955, eliminates the absolute quotas of 200 million cigars and 6-1/2 million pounds of scrap and filler tobacco. For duty purposes, an amount equivalent to 90 percent of the former absolute quotas in each case may be admitted duty free during the calendar years 1959-61, with quantities in excess of 90 percent of the base figure dutiable at the Cuban rate.

² Rates shown are those which were in effect as of November 1959. Rates for imports from countries or areas under Communist domination or control are those as listed under the Tariff Act of 1930, effective varying dates by countries from Sept. 1, 1951, to Jan. 5, 1952, under Section 5 of the Trade Agreement Extension Act of 1951.

Foreign Agricultural Service. Compiled from U. S. Tariff Commission, U. S. Department of Commerce, and U. S. Department of State publications.

THAILAND (SIAM)

Leaf tobacco:		
Unstemmed.....	24.2 Baht per kilo (or 36-2/3% ad valorem, whichever is higher)	0.53 or ad valorem rate
Stemmed.....	27.5 Baht per kilo (or 36-2/3% ad valorem, whichever is higher)	0.60 or ad valorem rate

PHILIPPINES, REPUBLIC OF⁵

Leaf tobacco:		
Unstemmed		
1. Wrapper.....	5.00 Pesos per kilo (legal weight)	1.14
2. Other.....	4.00 Pesos per kilo (legal weight) plus 50% ad valorem	0.90 plus 50% ad valorem
Stemmed:		
1. Wrapper.....	6.00 Pesos per kilo (legal weight)	1.36
2. Other.....	5.00 Pesos per kilo (Legal weight) plus 50% ad valorem	1.14 plus 50% ad valorem

See footnotes at end of table.

TABLE 38. --Import duty on tobacco in selected foreign countries importing from the United States, as of October 1959--Continued

HONG KONG

Description	Full rate of duty in--	
	Foreign unit	Approximate U. S. currency per pound ¹
Tobacco, unmanufactured:		<i>Dollars</i>
Containing 10 percent or more of moisture by weight--		
Unstripped.....	3.75 H. K. dol. per lb.	0.66
Stripped.....	3.90 H. K. dol. per lb.	.68
Containing less than 10 percent of moisture by weight--		
Unstripped.....	3.78 H. K. dol. per lb.	.66
Stripped.....	4.05 H. K. dol. per lb.	.71

AUSTRALIA

(1) Tobacco, unmanufactured, entered to be locally manufactured into tobacco other than fine-cut tobacco suitable for the manufacture of cigarettes - to be paid at the time of removal to the factory:		
Unstemmed.....	6s.6d. per lb.	0.72
Stemmed, or partly stemmed, or in strips.....	7s.0d. per lb.	.78
For the manufacture of tobacco containing not less than such proportion by weight of stemmed Australian-grown tobacco leaf (or its equivalent in terms of unstemmed tobacco leaf) to the total stemmed tobacco leaf (or its equivalent in terms of unstemmed tobacco leaf) used, as the Minister may from time to time determine having regard to the available supply of suitable Australian-grown tobacco leaf, as prescribed by Departmental by-laws:		
(a) Unstemmed.....	5s.0d. per lb.	.56
(b) Stemmed, or partly stemmed, etc.....	5s.6d. per lb.	.61
(2) Tobacco, unmanufactured, entered to be locally manufactured into cigarettes or into fine-cut tobacco suitable for the manufacture of cigarettes - to be paid at the time of removal to the factory:		
Unstemmed.....	8s.7d. per lb.	.95
Stemmed, or partly stemmed, or in strips.....	9s.1d. per lb.	1.01
For the manufacture of cigarettes containing not less than such proportion by weight of stemmed Australian-grown tobacco leaf (or its equivalent in terms of unstemmed tobacco leaf) to the total stemmed tobacco leaf (or its equivalent in terms of unstemmed tobacco leaf) used, as the Minister may from time to time determine having regard to the available supply of suitable Australian-grown tobacco leaf, as prescribed by Departmental by-laws:		
(a) Unstemmed.....	7s.2d. per lb.	.80
(b) Stemmed, or partly stemmed, etc.....	7s.8d. per lb.	.85
Tobacco, unmanufactured, entered to be locally manufactured into cigars - to be paid at the time of removal to the factory:		
Unstemmed.....	2s.6d. per lb.	.28
Stemmed, or partly stemmed, or in strips.....	3s.0d. per lb.	.33
Tobacco, unmanufactured, not elsewhere included.....	12s.0d. per lb.	1.33

NEW ZEALAND

Tobacco, unmanufactured, entered to be manufactured in New Zealand in any bonded tobacco factory licensed under the Tobacco Act, 1908, for manufacturing purposes only:		
Into tobacco, cigarettes, or snuff.....	3s.9d. per lb.	0.52
Into cigars.....	Free	Free

See footnotes at end of table.

TABLE 38. --Import duty on tobacco in selected foreign countries importing from the United States, as of October 1959--Continued

EGYPT

Description	Full rate of duty in -	
	Foreign unit	Approximate U. S. currency per pound ¹
Tobacco in leaves.....	400 piasters per net kilo	5.21

BRITISH WEST AFRICA

Tobacco, unmanufactured:		
Gambia.....	2s.9d. per lb.	0.39
Ghana.....	9s.3d. per lb.	1.30
Nigeria:		
For cigarette manufacture.....	15s.3d. per lb.	2.14
For other uses.....	15s.0d. per lb.	2.10
Sierra Leone.....	9s.0d. per lb.	1.26

OTHER COUNTRIES

Country	Import duty	Other restrictions
France.....	Free	Government monopoly
Italy.....	Free	Government monopoly
Japan.....	Free	Government monopoly
Spain.....	Free	Government monopoly
Sweden.....	Free	Government monopoly

¹ Conversions made at current official exchange rates. In addition to the rates of duty shown, certain of the countries impose surtaxes in the form of percentages of the duty, ad valorem, bill of entry tax, port dues, and varying additional duties.

² Belgium, Netherlands, and Luxembourg (Customs Union Tariff). Rates shown in terms of Belgian francs.

³ Government monopoly.

⁴ Duties for non-United States types of raw tobacco not shown.

⁵ Under Republic Act 698, as amended by Republic Act 1194, the importation of leaf tobacco (excepting cigar wrapper tobacco for cigars or chewing tobacco) is limited to the amount which, added to total Philippine production, will be sufficient to assure the output of a quantity of manufactured products not less than the output of the previous fiscal year. The rates shown are equivalent to 50% of the full rate; effective January 1, 1962, rates increase to 75% of the full rate.

Foreign Agricultural Service. Compiled from Board of Trade Journal, Trade Agreement publications, and from information by tariff specialists in the Bureau of Foreign and Domestic Commerce, U. S. Department of Commerce.

¹ Unmanufactured tobacco comprises leaf, stems, trimmings, and scrap. ² Preliminary. ³ Less than a 5-year average. ⁴ Estimated from data for less than one year, or from unofficial information. ⁵ Re-exports. ⁶ Includes manufactured tobacco. ⁷ All Germany 1935-46, Western Germany 1947 to date. ⁸ Data not available.

Foreign Agricultural Service. Prepared or estimated from official statistics of foreign governments, reports of United States Agricultural Attaches, office research, and other information.

BRIEF CLASSIFICATION OF LEAF TOBACCO

(Covering classes and types)

CLASS 1, FLUE-CURED TYPES

- Type 11: Old Belt flue-cured; produced in the Piedmont sections of Virginia and North Carolina.
Type 12: Eastern North Carolina flue-cured; produced in the coastal sections of North Carolina, north of the South River.
Type 13: South Carolina flue-cured; produced in the coastal sections of South Carolina and the southeastern counties of North Carolina, south of the South River.
Type 14: Georgia and Florida flue-cured; produced in southern Georgia and northern Florida.

CLASS 2, FIRE-CURED TYPES

- Type 21: Virginia fire-cured; produced in the Piedmont and mountain sections of Virginia.
Type 22: Tennessee-Kentucky fire-cured, eastern district, Clarksville, Springfield, and Hopkinsville; produced in a section east of the Tennessee River, in southern Kentucky and northern Tennessee.
Type 23: Kentucky-Tennessee fire-cured, western district, Mayfield, and Murray; produced in a section between the Tennessee, Ohio, and Mississippi rivers in western Kentucky and northwestern Tennessee.

CLASS 3, AIR-CURED TYPES

LIGHT AIR-CURED (CLASS 3a)

- Type 31: Burley; produced in Kentucky, Tennessee, Ohio, Indiana, West Virginia, Virginia, North Carolina, and Missouri.
Type 32: Southern Maryland; produced in five counties of southern Maryland--Prince Georges, Anne Arundel, Calvert, Charles, and St. Marys.

DARK AIR-CURED (CLASS 3b)

- Type 35: One Sucker; produced in north-central Tennessee and south-central Kentucky.
Type 36: Green River; produced in the northern part of Kentucky in the territory adjacent to Owensboro and Henderson.
Type 37: Virginia sun-cured; produced in central Virginia, north of the James River.

CLASS 4, CIGAR-FILLER TYPES

- Type 41: Pennsylvania Seedleaf; produced in Lancaster County, Pa., and the adjoining counties.
Type 42-44: Ohio filler; produced in the Miami Valley section of Ohio and extending into Indiana.
Type 46: Puerto Rican sun-grown, including primed (Deshojado) and stalk-cut (Mata); produced on the Island of Puerto Rico.

CLASS 5, CIGAR-BINDER TYPES

- Type 51: Connecticut Broadleaf; produced in the Connecticut Valley sections of Connecticut and Massachusetts.
Type 52: Connecticut Havana Seed; produced in the Connecticut and Housatonic Valley sections of Connecticut and Massachusetts.
Type 53: New York and Pennsylvania Havana Seed; produced in the Big Flats and Onondaga sections of New York, and extending into Pennsylvania.
Type 54: Southern Wisconsin; produced in Wisconsin, south and east of the Wisconsin River.
Type 55: Northern Wisconsin; produced in Wisconsin, north and west of the Wisconsin River, and in eastern Minnesota.

CLASS 6, CIGAR-WRAPPER TYPES

- Type 61: Connecticut Shade; produced in the Connecticut Valley sections of Connecticut and Massachusetts.
Type 62: Georgia and Florida Shade; produced in southwestern Georgia and north-central Florida.

MISCELLANEOUS TYPES OF DOMESTIC TOBACCO

- Type 72: Louisiana Perique.
Type 73: All domestic types of tobacco not otherwise classified.
Type 77: Domestic Aromatic.

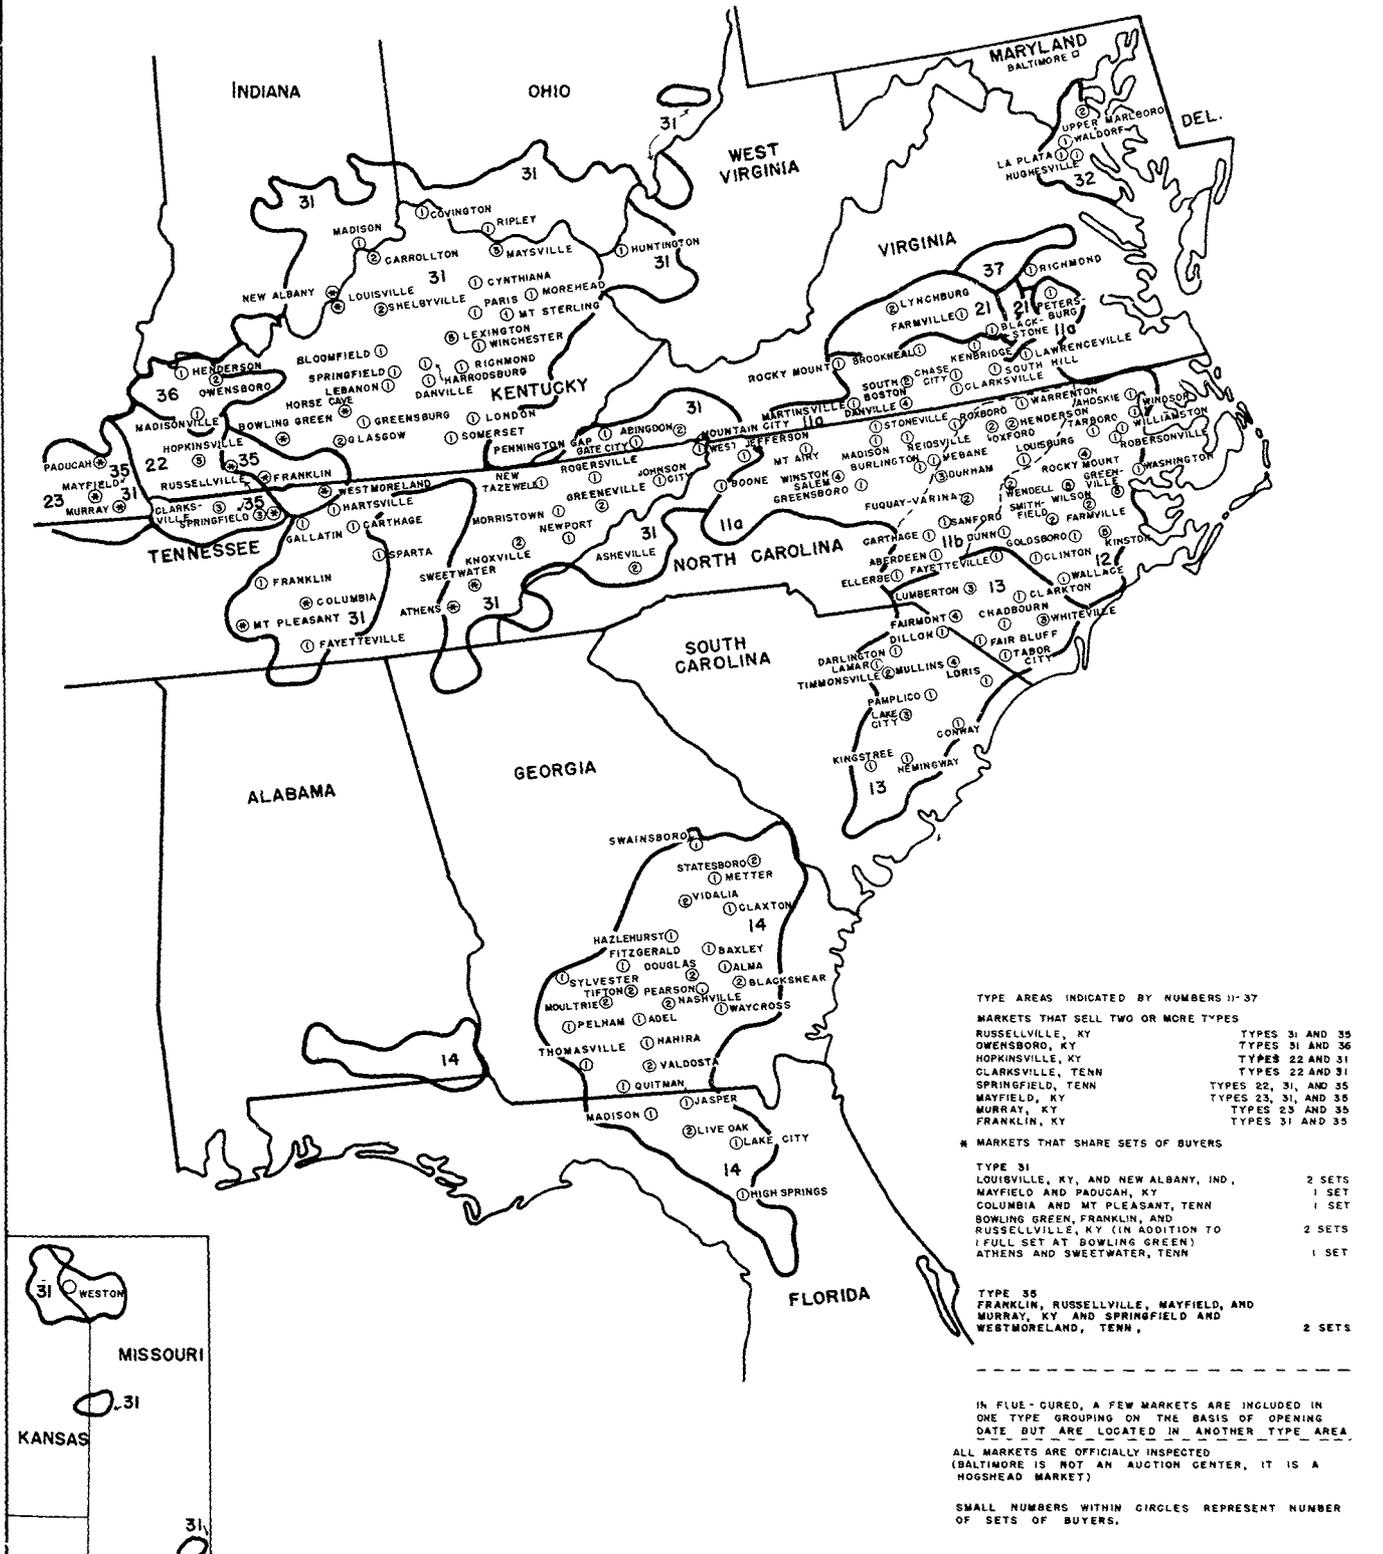

FOREIGN TYPES

- Type 81: Cuba (Havana).
Type 82: Sumatra and Java.
Type 83: Philippine Islands (Manila).
Type 84: All foreign-grown cigar-leaf not otherwise classified.
Type 90: Foreign-grown cigarette and smoking tobacco (Turkish and other).

TOBACCO

AUCTION MARKETS AND PRODUCING AREAS, 1958-59

(CIGAR LEAF PRODUCING AREAS NOT SHOWN)

TYPE AREAS INDICATED BY NUMBERS 11-37

MARKETS THAT SELL TWO OR MORE TYPES

RUSSELLVILLE, KY	TYPES 31 AND 35
OWENSBORO, KY	TYPES 31 AND 36
HOPKINSVILLE, KY	TYPES 22 AND 31
CLARKSVILLE, TENN	TYPES 22 AND 31
SPRINGFIELD, TENN	TYPES 22, 31, AND 35
MAYFIELD, KY	TYPES 23, 31, AND 35
MURRAY, KY	TYPES 23 AND 35
FRANKLIN, KY	TYPES 31 AND 35

MARKETS THAT SHARE SETS OF BUYERS

TYPE 31	
LOUISVILLE, KY, AND NEW ALBANY, IND.	2 SETS
MAYFIELD AND PADUCAH, KY	1 SET
COLUMBIA AND MT PLEASANT, TENN	1 SET
BOWLING GREEN, FRANKLIN, AND RUSSELLVILLE, KY (IN ADDITION TO FULL SET AT BOWLING GREEN)	2 SETS
ATHENS AND SWEETWATER, TENN	1 SET

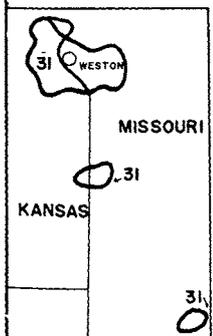

TYPE 35

FRANKLIN, RUSSELLVILLE, MAYFIELD, AND MURRAY, KY AND SPRINGFIELD AND WESTMORELAND, TENN.	2 SETS
--	--------

IN FLUE-CURED, A FEW MARKETS ARE INCLUDED IN ONE TYPE GROUPING ON THE BASIS OF OPENING DATE BUT ARE LOCATED IN ANOTHER TYPE AREA

ALL MARKETS ARE OFFICIALLY INSPECTED (BALTIMORE IS NOT AN AUCTION CENTER, IT IS A HOGSHEAD MARKET)

SMALL NUMBERS WITHIN CIRCLES REPRESENT NUMBER OF SETS OF BUYERS.
