Department of  
Agriculture

Washington, D.C.

---

Released December 20, 1993, by the Agricultural Statistics Board. Estimates refer to November 1992 and 1993.

## Catfish Processing Up 4 Percent

Farm-raised catfish processed during November totaled 36.6 million pounds round weight, up 4 percent from November 1992. The January through November 1993 cumulative total of round weight processed, at 425 million pounds, was up slightly from the same period the previous year. The average price paid to producers was 73 cents per pound for November 1993, 11 cents above a year ago but unchanged from the previous month.

Net pounds of processed fish sold during November totaled 17.7 million pounds, an increase of 5 percent from the comparable month in 1992. Sales of fresh fish, at 6.99 million pounds, represented 39 percent of total sales and were down 3 percent from November 1992. Frozen fish sales, at 10.7 million pounds, accounted for the remaining 61 percent of total sales and were up 11 percent from the same month a year ago. Sales of whole fish represented 27 percent of the total, fillets accounted for 52 percent, and the remaining 21 percent were mostly steaks, nuggets, and value added products. Total inventory at the end of November was 9.90 million pounds, down 6 percent from the previous year.

The November 1993 average price received by processors for total fresh fish was \$2.06 per pound, compared with \$1.85 last year. Prices for fresh whole fish increased 19 cents per pound to \$1.52. Prices for fresh fillets also increased 19 cents to \$2.67 per pound. Total frozen fish averaged \$2.32 per pound, compared with \$2.17 per pound in November 1992. Prices for frozen whole fish increased 19 cents per pound to \$1.79 and frozen fillets increased 21 cents per pound to \$2.65 per pound.

Freshwater catfish imports during October 1993 totaled 596 thousand pounds, compared with 187 thousand pounds imported the previous year. Ninety-two percent of the imports were from Brazil and the remaining 8 percent from Mexico. There were no exports reported for October 1993. Import and export data were compiled by the U.S. Bureau of the Census.

1/ Not published to avoid disclosure of individual operations.

2/ Includes all products not already reported, such as nuggets, including weight of breading and added ingredients.

3/ Includes regular, shank, and strip fillets; excludes any breaded product.

## Catfish Processing Estimates

**Survey Procedures:** Survey data for catfish processing are collected from approximately 30 processors. All participating processors must meet the minimum criteria of having a capacity to process at least 2,000 pounds live weight of catfish per 8-hour shift. The survey is conducted entirely by NASS Headquarter's staff in Washington, D.C. NASS field offices, however, are responsible for keeping Headquarters informed of any new processing operations in their state to ensure that the survey coverage is as complete as possible. Processors are contacted either by mail or telephone. Diligent effort is made to ensure that all operations are accounted for in the estimate.

**Estimation Procedures:** The "Catfish Processing" report refers strictly to farm-raised fish and excludes wild capture fish. Prior to summarization, questionnaires are compared with the previous month's reports for comparable placement of data, reasonable price levels, and reasonable inventory carryover given the sales and processing totals reported. Estimates are made for those processors whose reports are not available in time to be included in the release. These plants are identified by an asterisk on page 5 of this release. Estimates are normally based on the processor's previous report and current conditions. Published totals are a straight summation of the individual reports and estimated data. Price items are weighted by the associated volumes to compute weighted average prices. The published price for total whole fish, however, reflects an adjustment to the round and gutted only price to bring it to an equivalent dressed weight price.

If a plant uses a fiscal accounting system, proration is used to convert reported data to a calendar month basis. Only national level estimates are published due to the limited number of plants involved. Generally, individual items are not published if there are less than three plants reporting, or if any one plant has 60 percent or more of the total.

One unique feature of the "Catfish Processing" report is the listing of cooperating processors by name on each month's release. This feature originally was used to solicit industry cooperation in maintaining coverage, but it has continued because of the processors' overall acceptance of this policy.

Import and export data for frozen catfish fillets, which are compiled by the Department of Commerce, are also included in this report.

**Reliability:** Catfish processing estimates are based on a census of all known active processors and, therefore, have no sampling variability. However, estimates may be subject to errors such as omissions, duplication, and mistakes in reporting, recording, and processing of the data. These errors are minimized through strict quality controls in the edit and summarization process, and a careful review of all reported data for consistency and reasonableness.

**Revision Policy:** An annual summary of reported data are sent to each plant at the end of the year. Plants are asked to identify erroneous data and return the summaries. Revisions may be necessary following a review of the summaries returned by the plants. Revisions of less than 2 percent of the existing published levels of any category will normally not be made.

**Definitions Used For Catfish Processing:**

**Fillets** - Boned sides of the fish, cut lengthwise away from the backbone.

**Fresh Fish** - Fish intended for immediate consumption. Also referred to as ice-packed.

**Frozen Fish** - Fish which are individually quick frozen and glazed (IQF) or individually bagged and bulk frozen.

**Nuggets** - Small fillets cut from below the rib section of the fish. Usually includes breading or added ingredients.

**Round & Guttled Only** - Fish with no processing done or viscera only removed.

**Round Weight** - A term for fish live weight.

**Steaks** - Cross-section cuts from larger dressed fish.

**Strips** - Finger size pieces of fish cut from fillets. Usually includes breading or added ingredients.

**Whole Dressed** - Weight of whole fish with only head, viscera, and skin removed. Generally, 60 percent of the live weight remains as dressed fish.

**Processing data were compiled in cooperation with the following processors:**

America's Catch	Guess Processing
Amite River Industries	Guidry Catfish Processors, Inc.
Aqua Farm Catfish, Inc.	Harvest Select
*Arkansas Fresh Catfish	Kueter's Lake
Cargill Fisheries Products	La Louision
Carolina Classics Catfish, Inc.	Lake's Farm Raised Catfish, Inc.
Confish, Inc.	Limestone Fish Processors
Corbin Fish Farm	Pride of the Pond
Delta Pride Catfish, Inc.	Prime Line Catfish Co.
Dorey Fish Co.	Saul's Fish Processors
*Farm Fresh Catfish Co.	Seabrook Seafood, Inc.
Fish Breeders of Idaho	Simmons Farm-Raised
Florida Aquaculture Processors	Southern Farm Fish Processors
Franklin Catfish	Southern Pride
Freshwater Farms, Inc.	Southfresh Farms Processors, Inc.
