SOUTH CENTRAL: The average paid by feedlots on October 1 for alfalfa ground and delivered was \$182.07, up \$5.06 from the previous month, usage was 300T/day, up 5% and total usage was 9,004T.

Hay market prices remain steady for alfalfa and grass hay while trades picked up a bit. A myriad of issues is facing agriculture currently causing feed price to rise; and include, higher oil, fertilizer and grain price, a slowdown in parts, equipment, trucking, and labor, then there is the drought. Due to these factors, many are looking for hay to become the main feed source for producer this winter. Presently hay seems to be readily available, as most end users are currently full. Rain blessed some across the state again last week slowing harvest but helping the soil profile. According to the US Drought Monitor for the week of October 12th, abnormally dry conditions (D0) decreased to 24.5%, moderate drought (D1) remained near 11%, and severe drought (D2) decreased to near 3%. If you have any extra hay to sell and/or need hay here in Kansas, use the services of the Internet Hay Exchange: [www.hayexchange.com/ks.php](http://www.hayexchange.com/ks.php).
