Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Hay market prices were steady across the state on limited test with lots of field work being performed; Demand was light to moderate as the green up begins and feeding slows with cattle being turned out and feeders switch to summer rations. Folks have been busy spraying for weeds and pests, with both weevil and aphids making their appearance in fields. However, with a late April snow this week, hay producers are holding their breath that young alfalfa does not receive freeze damage. The western third of the state remains in abnormally dry to moderate drought conditions but thankfully, has not worsened in the last several weeks. According to the US Drought Monitor for the week of April 13th, abnormal dryness (D0) remained at 10 %, moderate drought (D1) remained at 10%, and severe drought (D2) remained at 2%. If you have any extra hay to sell and/or need hay here in Kansas, use the services of the Internet Hay Exchange: [www.hayexchange.com/ks.php](http://www.hayexchange.com/ks.php).

\*\*\*Prices are dollars per ton and FOB unless otherwise noted. Dairy alfalfa prices are for mid and large squares unless otherwise noted. Horse hay is in small squares unless otherwise noted. Prices are from the most recent sales. \*CWF Certified Weed Free
