Hay market prices were steady with an undertone of strength, while demand remained strong. Movement was good for those who have not been affected by illness or quarantines. Warm and dry weather seems to be the norm across the state, and all could use some rain, which, hopefully, will be received this week. According to US Drought Monitor for the week of November 17th, moderate to severe drought continues to stretch over much of Kansas and Nebraska with conditions deteriorating across most of Kansas, but more stable farther north. Abnormal dryness (D0) decreased to 28%, moderate drought (D1) increased to 44%, severe drought (D2) increased to 13%, and extreme drought (D3) increased to just over 2%. Subsoil moisture supplies rated 23% very short, 41% short, 35% adequate, and 1% surplus. If you have any extra hay to sell and/or need hay here in Kansas, use the services of the Internet Hay Exchange: [www.hayexchange.com/ks.php](http://www.hayexchange.com/ks.php).

\*\*\*Prices are dollars per ton and FOB unless otherwise noted. Dairy alfalfa prices are for mid and large squares unless otherwise noted. Horse hay is in small squares unless otherwise noted. Prices are from the most recent sales. \*CWF Certified Weed Free
