2007 Number of Farms and Land in Farms Highlights

The number of farms in the United States in 2007 is estimated at 2.08 million, 0.6 percent fewer than in 2006. Total land in farms, at 930.9 million acres, decreased 1.5 million acres, or 0.16 percent, from 2006. The average farm size was 449 acres during 2007, an increase of three acres from the previous year. The decline in the number of farms and land in farms reflects a continuing consolidation in farming operations and diversion of agricultural land to nonagricultural uses.

Farm numbers and land in farms are broken down into five economic sales classes. Farms and ranches are classified into these “sales classes” by summing their sales of agricultural products and government program payments. Sales class breaks occur at \$10,000, \$100,000, \$250,000, and \$500,000.

Farm numbers declined in the \$1,000 - \$9,999 and the \$10,000 - \$99,999 sales classes. Farm numbers rose slightly in the three largest sales classes. The changes within the sales classes were a result of operations moving to larger sales classes by consolidation or expansion and strong commodity prices. Because of higher prices, many farms and ranches near the top of their sales class in 2006 moved into the next higher sales class in 2007 without adding land or otherwise expanding their operations.

The largest percentage changes from 2006 occurred in the smallest and largest sales classes. Farm numbers declined 1.5 percent, to 1.14 million farms, in the \$1,000 - \$9,999 sales class. Meanwhile, farm numbers increased 4.4 percent, to 84,970 farms, in the \$500,000 and over sales class. The number of farms with less than \$100,000 in sales fell 1.2 percent from 2006 while the number of farms with \$100,000 or more in sales rose 2.2 percent.

Land in farms also shifted from lower sales classes to higher sales classes. In the \$1,000 - \$9,999 sales class, land in farms dropped 1.6 percent, to 112.8 million acres, while land operated by farms in the largest sales class, \$500,000 & over in sales, increased 1.8 percent, to 217.3 million acres.

Over all, the **average farm size** increased three acres in 2007. However, average farm sizes declined in some of the sales classes due to smaller farms moving up to higher sales classes.

This report also contains estimates of farm numbers and land in farms for **Puerto Rico**. The number of farms with sales of \$1,000 or more in Puerto Rico was 13,500 in 2007, down 100 farms from 2006. Land in farms, at 600,000 acres, is down 10,000 acres from the previous year. The average farm size in Puerto Rico in 2007 was estimated at 44 acres.

Livestock Operations 2007 Summary

The number of operations with cattle totaled 967,440 during 2007, down slightly from 2006 and 2 percent below 2005. Beef cow operations in 2007 were down 1 percent from 2006 and 2 percent below 2005. Milk cow operations were 5 percent below last year and 9 percent below two years ago.

The three operation classes: cattle, beef cows, and milk cows, are classified into size groups independently. Therefore, it is possible to have more beef cow operations in a particular size group than cattle operations. As an example, an operator with 75 cattle and 40 beef cows would be classified in the 50-99 size group for cattle and 1-49 size group for beef cows.

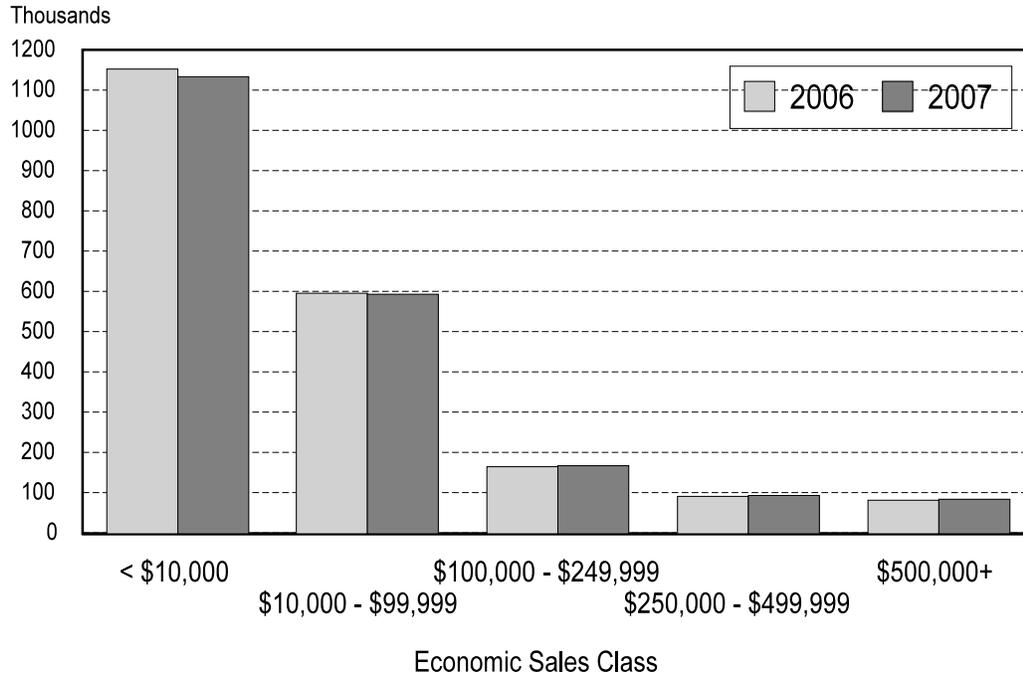

The number of operations with hogs totaled 65,640 during 2007, down slightly from 2006 and down 2 percent from 2005. Places with 2,000 or more head accounted for 82 percent of the inventory.

The number of operations with sheep totaled 70,590 during 2007, up 2 percent from 2006 and up 3 percent from 2005. Of all sheep operations that include breeding sheep, 91.1 percent were comprised of 1-99 head, 7.4 percent had 100-499 head, and the remaining 1.5 percent were operations with 500 head or more. Operations with 1-99 head account for 30.8 percent of the inventory, 100-499 head account for 23.1 percent of the inventory, and 500+ head account for 46.1 percent of the inventory.

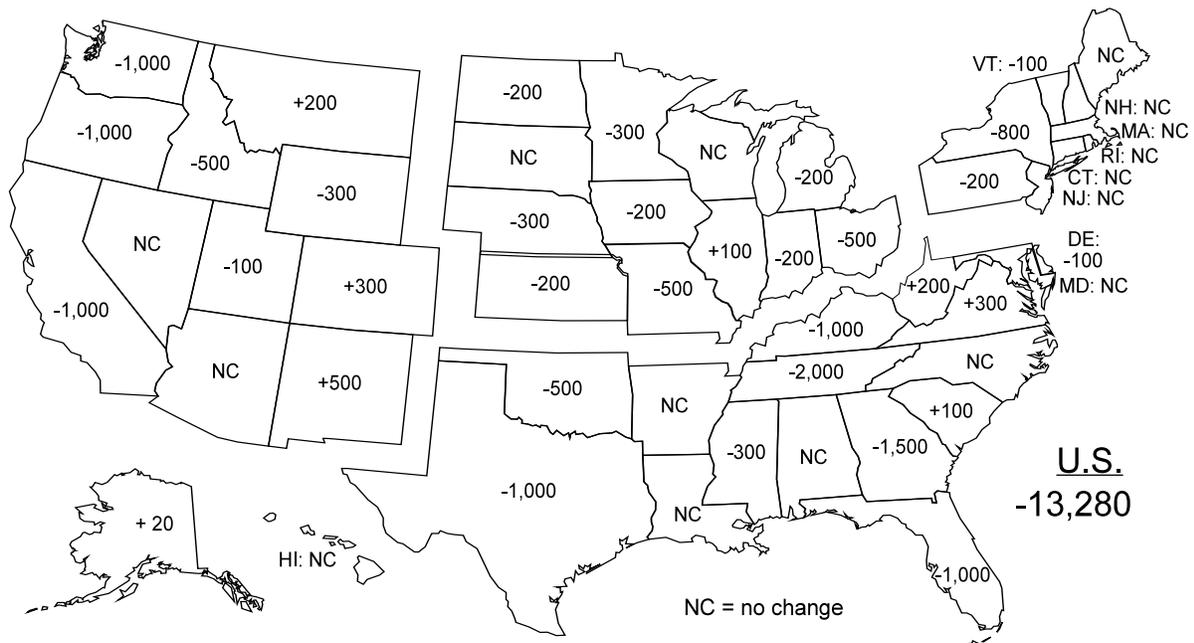

The number of operations with goats totaled 108,130 during 2007, up 4 percent from 2006. Angora goat operations totaled 4,550, down 4 percent from 2006. Milk goat operations totaled 19,930, up slightly from 2006. Meat goat operations totaled 90,270, up 4 percent from 2006. Total goat operations will be equal to or less than the sum of angora, milk and meat because places which own more than one goat type only count as one operation. This is the first annual publication of goat operations.

This report also contains annual estimates of **Puerto Rico** livestock operations. Operations with cattle and calves were 4,100, down 2 percent from 2006; operations with beef cows were 2,600, down 4 percent from 2006; operations with milk cows were 1,500, unchanged from 2006; operations with hogs were 1,500, unchanged from 2006; and operations with sheep were 800, unchanged from the previous year.

¹ An operation is any place having one or more head of milk cows, excluding cows used to nurse calves, on hand at any time during the year.

² Included in operations with cattle. Missing data combined with other size groups to avoid disclosing individual operations.

³ Individual State estimates not available for the 20 other States.

Reliability of Farm Numbers and Land in Farms Data in this Report

Survey Procedures: Data are collected by the National Agricultural Statistics Service (NASS) during the June Agricultural Survey using sampling procedures to ensure every farm and ranch has a chance of being selected. NASS uses a multiple sampling frame approach to count farms and measure land in farms. An Area Sampling Frame that divides all land into segments is built for every State. A sample of segments is selected in each State and enumerated in early June. Highly trained interviewers locate each sampled segment and identify every farm and ranch operating land in the segment and the number of acres in each operation.

These data are used to compute summary indications of farm numbers and acres of land in farms. Additionally, all farms found in the segments are checked against a list of farms and ranches maintained by NASS to determine if the farm is on the list. Operations found in the Area Frame sample that are not on the list provide a measure of incompleteness of the list. The summarized totals for these non-overlap (or not-on-list) operations are combined with summarized totals collected from a sample selected from the list to calculate additional indications of farms and land in farms.

Estimation Procedures: Data are checked for reasonableness and consistency and summarized for each state. State estimates are aggregated to regional and national totals for Headquarters review. Field Offices perform a thorough review of their survey results and historical data relationships and recommend official estimates. Headquarters establishes regional and national estimates and ensures that state estimates are in balance with the Regional and National numbers.

Revision Policy: Estimates are subject to revision the following year and following review of the five-year Census of Agriculture. The basis for revision must be supported by additional data which directly affects the level of the estimate. Historical publication statistical bulletin, NASS-SB991 (04), with revisions for 1998-2002 was published February 27, 2004.

Reliability: Two types of errors, sampling and nonsampling, are possible in an estimate based on a sample survey. Both types can affect the quality of the estimates.

Sampling error occurs because a complete census is not taken. The sampling error measures the variation in estimates from the average of all possible samples. An estimate of 100 with a sampling error of 1 would mean that chances are 19 out of 20 that the estimates from all possible samples averaged together would be between 98 and 102; which is the survey estimate, plus or minus two times the sampling error. The sampling error expressed as a percent of the estimate is called the relative sampling error. The relative sampling error for the U.S. number of farms and land in farms is just above 1.5 percent. The sampling error for total number of farms and total land in farms is less than the sampling error for each component of the total, such as number of farms by economic sales class. Relative sampling errors by economic sales class generally ranged from 2.1 to 2.9 percent for number of farms and 3.8 to 7.0 percent for land in farms at the U.S. level.

Nonsampling errors can occur in complete censuses as well as sample surveys. They are caused by the inability to obtain correct information from each person surveyed, differences in interpreting questions or definitions, and mistakes in coding or processing the data. Special efforts are taken at each step of the survey to minimize nonsampling errors.

Terms and Definitions

A **farm** is “any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the year”. Government payments are included in sales. Ranches, institutional farms, experimental and research farms, and Indian Reservations are included as farms. Places with the entire acreage enrolled in the Conservation Reserve Program (CRP), Wetlands Reserve Program (WRP), or other government programs are counted as farms.

The definition of a farm was first established in 1850 and has changed nine times since. The current definition was first used for the 1974 census.

Land in farms consists of agricultural land used for crops, pasture, or grazing. Also included is woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator’s total operation. Land in farms includes acres in the Conservation Reserve, Wetlands Reserve Programs, or other government programs.

Land in farms includes land owned and operated as well as land rented from others. Land used rent-free is included as land rented from others. All grazing land, except land used under government permits on a per-head basis, is included as land in farms provided it was part of a farm or ranch. Land under the exclusive use of a grazing association is reported by the grazing association and included as land in farms. All land in American Indian reservations used for growing crops or grazing livestock is included as land in farms. Land in reservations not reported by individual American Indians or non-Native Americans is reported in the name of the cooperative group that used the land. In many instances, the entire American Indian reservation is reported as one farm.

Economic sales classes are based on the gross value of agricultural products sold. Government program payments are also included.

Point Farms are places that did not have \$1,000 of reported sales for the year, but had sufficient crops and livestock to normally have sales of \$1,000 or more.

A **cattle operation** is any place having one or more head of cattle on hand at any time during the year.

A **beef cow operation** is any place having one or more head of beef cows on hand at any time during the year.

A **milk cow operation** is any place having one or more head of milk cows on hand at any time during the year.

A **hogs and pigs operation** is any place having one or more hog or pig on hand at any time during the year.

A **sheep and lamb operation** is any place having one or more head of sheep or lambs on hand at any time during the year.

A **goat and kid operation** is any place having one or more head of goats or kids on hand at any time during the year.

Farm Definition History: The definition of a farm has remained the same since 1974. Activities included as agriculture, however, have undergone modification in recent years. Beginning in 1995, operations having 5 or more horses or ponies and no other agricultural sales were counted as farms. An operation with 1 or more horses with agricultural sales of at least \$1,000, qualified as a farm. Two industries, maple syrup and short rotation woody crop farms, were added beginning in 1997 as a result of the new North American Industry Classification System (NAICS). All the changes to agricultural activity included in the farm definition beginning in 1995 were carried back to 1993 and included in the 1993-1998 estimates. These changes bring comparability between the Census of Agriculture data and the annually published NASS estimates. Because of these changes, the official estimates show a level difference in the number of farms between 1992 and 1993 in some states. To further align the counting of farms with the Census of Agriculture, places with only 100 acres or more of pasture in 2002 were included in farm and land in farm numbers. The handling of Indian reservation land was changed in 2002 to provide some accounting for individual farms.

**Minimum Criteria for “FARM” Definition, 1840 - Present
and Enumeration of Apiaries and Fur Farms**

| Year | Acres in Place | Value of Agricultural Products (Produced) | Value of Sales of Agricultural Products | Required some Agricultural Operations | Apiaries and Fur Farms Enumerated |
|----------------|----------------------------|---|---|---------------------------------------|-----------------------------------|
| 1974 - Present | -- | -- | \$1,000 or more | -- | -- |
| 1959 | Less than 10 10 or more | -- -- | \$250 or more \$50 or more | -- -- | -- -- |
| 1954 | Less than 3 3 or more | -- \$150 or more | \$150 or more -- | -- -- | -- -- |
| 1950 | Less than 3 3 or more | -- \$150 or more | \$150 or more -- | -- -- | Apiaries Fur Farms |
| 1935 - 1945 | Less than 3 3 or more | \$250 or more -- | -- -- | -- X | Apiaries Fur Farms |
| 1930 | Less than 3 3 or more | \$250 or more -- | -- -- | -- X | Apiaries -- |
| 1925 | Less than 3 3 or more | \$250 or more -- | -- -- | -- X | -- -- |
| 1910 - 1925 | Less than 3 3 or more | \$250 or more -- | -- -- | -- X | Apiaries -- |
| 1900 | Less than 3 3 or more | -- -- | -- -- | -- X | Apiaries -- |
| 1870 - 1890 | Less than 3 3 or more | -- -- | \$500 or more -- | -- X | Apiaries -- |
| 1860 | -- | -- | -- | -- | -- |
| 1850 | -- | \$100 or more | -- | -- | Apiaries |
| 1840 | -- | -- | -- | -- | -- |

Information Contacts

Questions about the data in this report should be directed to the commodity specialists listed below.

Farm Numbers and Land in Farms

Kevin Barnes, Chief, Environmental, Economics, and Demographics Branch (202) 720-6146
Kevin Hintzman, Head, Economics Section (202) 720-6146
Scott Shimmin- Farm Numbers and Land in Farms (202) 690-3231

Livestock Operations

Dan Kerestes, Chief, Livestock Branch (202) 720-3570
Shawn Clark, Head, Livestock Section (202) 720-3570
Bruce Boess - Hogs and Pigs (202) 720-3106
Jim Collom - Dairy Products (202) 690-3236
Joe Gaynor - Dairy Products Prices (202) 690-2168
Jason Hardegree - Milk Production and Milk Cows (202) 720-3278
Benita Hodge - Livestock Slaughter (515) 284-4340
Scott Hollis - Sheep & Lambs, Goats & Kids (202) 720-4751
Mike Miller - Cattle, Cattle on Feed (202) 720-3040

ACCESS TO REPORTS!!

For your convenience, there are several ways to obtain NASS reports, data products, and services:

INTERNET ACCESS

All NASS reports are available free of charge on the worldwide Internet. For access, connect to the Internet and go to the NASS Home Page at: www.nass.usda.gov.

E-MAIL SUBSCRIPTION

All NASS reports are available by subscription free of charge direct to your e-mail address. Starting with the NASS Home Page at www.nass.usda.gov, under the right navigation, *Receive reports by Email*, click on **National** or **State**. Follow the instructions on the screen.

PRINTED REPORTS OR DATA PRODUCTS

CALL OUR TOLL-FREE ORDER DESK: 800-999-6779 (U.S. and Canada)
Other areas, please call 703-605-6220 FAX: 703-605-6900
(Visa, MasterCard, check, or money order acceptable for payment.)

ASSISTANCE

For **assistance** with general agricultural statistics or further information about NASS or its products or services, contact the **Agricultural Statistics Hotline** at **800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
