Citrus Fruits

Final Estimates 1992-97

USDA

Citrus Fruits: Final Estimates by States, 1992-97, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service, Statistical Bulletin No. 961.

Introduction: This bulletin presents final estimates, including revisions made by the Agricultural Statistics Board (ASB), for the production years 1992 through 1997. Bearing acreage, yield, utilized production, price, and value data were published during calendar years 1993-98 in periodic ASB reports. Data included in this publication provide a historic record and a benchmark for current estimates.

Procedures: Revisions were made after a thorough review of the original survey data and all additional data now available, including the 1997 Census of Agriculture. Other data considered included marketing agreement records, recorded truck and rail movement, quantities inspected, quantities used by processors, and the latest citrus surveys. The current acreages were evaluated with historic totals to ensure comparability with past Census relationships. The 1992-97 estimates shown herein are considered final and will not be revised again.

At the National level, utilized production estimates were revised only in the 1996-97 season. The revisions were less than one percent for oranges, grapefruit, and lemons and just over 2 percent for tangerines. Value of production was revised less than one percent for grapefruit in the 1995-96 season and less than one percent for oranges, grapefruit, and lemons in the 1996-97 season. Tangerine value of production was revised 3 percent in the 1996-97 season. Revisions were mainly attributable to revised fresh and processed estimates.

Historic Estimates: Estimates of citrus fruits for earlier years are available in the following Statistical Bulletins: No. 899 for 1986-87 to 1991-92, No. 796 for 1981-82 to 1986-87, No. 712 for 1977-78 to 1981-82, No. 643 for 1974-75 to 1977-78, No. 579 for 1969-70 to 1974-75, No. 493 for 1964-65 to 1969-70, No. 380 for 1909-10 to 1964-65.

Other Statistical Bulletins: The National Agricultural Statistics Service will issue a series of twenty bulletins in 1998-99 containing final estimates for agricultural commodities based on the review of the 1997 Census of Agriculture and other information. The product number, bulletin title, and tentative release dates are as follows.

NASS-SB944	Chickens and Eggs - Final Estimates 1994-97	12/10/98

Electronic Publications: These bulletins will be available free of charge on the Internet from the NASS Home Page at: <http://www.usda.gov/nass/>, in either text or PDF format. From the Homepage select "Historic Data," then "Statistical Bulletins."

Internet Published Estimates Data Base: Selected historical State and U.S. information is now available in an online data base via the Internet free of charge. County information will be available by mid 1999. The database allows custom extracts based on commodity, year, state and other selection criteria and produces an output file compatible for updating databases and spreadsheets. The database can be accessed from the NASS Home Page at: <http://www.usda.gov/nass/>.

Printed Copies: Printed copies of the bulletins may be ordered by calling the Sales Order Desk toll free at 1-800-999-6779. Costs for printed copies of the publications range from \$15.00 to \$20.00. Visa, MasterCard, check, or money order are acceptable for payment.

Agricultural Census Publications: The Volume 1, Geographic Area Series publication containing the United States Summary provides National data and selected data for each State. Separate State reports present statistics for the entire State and each county. Census reports cover the 1997 production year, with comparative data for earlier census years. The 1997 Census of Agriculture Geographic Area Series products, including all manipulable data files and Adobe Acrobat (PDF) files of the printed reports, are available on the Internet at <http://www.usda.gov/nass/>. The information is also available on CD-ROM, and in printed publications. Printed copies of the Census publications and CD-ROM's may be ordered by calling the Sales Order Desk toll free at 1-800-999-6779.

Assistance: For more information pertaining to this bulletin call Crops Branch at (202) 720-2127. For assistance with general agricultural statistics or further information about NASS or its products and services, contact the **Agricultural Statistics Hotline at 1-800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C., 20250-9410, or call 202-720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

¹ Equivalent packinghouse-door returns.

² See page 22 for price per box calculations.

³ K-Early Citrus estimates began in 1992-93.

⁴ Includes tangelos and tangors.

Marketing Seasons and Net Weight per Box

Oranges:

Arizona	November 1 to August 31	75 pounds
California Navels	November 1 to June 15	75 pounds
California Valencias	March 15 to December 20	75 pounds
Florida Early and Midseason	October 1 to April 15	90 pounds
Florida Valencia	February 1 to July 31	90 pounds
Texas	September 25 to May 15	85 pounds

Grapefruit:

Arizona	November 1 to July 31	67 pounds
California (Desert)	November 15 to July 15	67 pounds
California (Other Areas)	March 20 - October 30	67 pounds
Florida	September 10 to July 31	85 pounds
Texas	October 1 to May 30	80 pounds

K-Early Citrus Fruit:

Florida	October 1 to November 30	90 pounds
---------	--------------------------	-----------

Lemons:

Arizona	August 15 to March 1	76 pounds
California	August 1 to July 31	76 pounds

Limes:

Florida	April 1 to March 31	88 pounds
---------	---------------------	-----------

Tangelos:

Florida	October 15 to April 15	90 pounds
---------	------------------------	-----------

Tangerines:

Arizona	November 1 to February 1	75 pounds
California	November 1 to May 15	75 pounds
Florida	October 1 to April 1	95 pounds

Temples:

Florida	December 1 to May 1	90 pounds
---------	---------------------	-----------

Marketing Year Average Prices and Value of Production

State level marketing year average (MYA), or price per box, for fresh and processed sales are the weighted average of monthly sales that occur during a crop's marketing season, adjusted to the packinghouse-door level. The "all" sales MYA price is derived by dividing the "all" sales value by the "all" sales boxes. MYA prices at the U.S. level for commodities with different state box weights are computed as follows:

$$\text{Fresh Market MYAP} = \frac{\sum(\text{State Fresh Value} * \text{State Box Weight})}{\sum(\text{State Fresh Boxes} * \text{State Box Weight})}$$

$$\text{Process Market MYAP} = \frac{\sum(\text{State Process Value} * \text{State Box Weight})}{\sum(\text{State Process Boxes} * \text{State Box Weight})}$$

$$\text{"All" Sales MYAP} = \frac{\sum(\text{State All Value} * \text{State Box Weight})}{\sum(\text{State All Boxes} * \text{State Box Weight})}$$

For commodities with the same box weights across all states, the U.S. MYA's are derived by dividing the sum of state's values by the sum of states' boxes.

U.S. value of production for a given commodity is the sum of the state's values for that commodity. The state level value of production for each commodity is computed as follows:

$$\text{Fresh Market Value} = \text{Fresh Market MYAP} * \text{Fresh Market Boxes}$$

$$\text{Process Market Value} = \text{Process Market MYAP} * \text{Process Market Boxes}$$

$$\text{"All" Sales Value} = \text{Fresh Market Value} + \text{Process Market Value}$$

Citrus prices are based on weighted average f.o.b. packed prices received for fresh fruit and weighted average prices received at the processing plant door for processing fruit. Equivalent returns for fresh and processed fruit are calculated at the packinghouse-door level by deducting sorting, grading, packing, cooling, marketing, and other costs from the two base prices. In some cases, this results in negative returns.
