Introduction

Citrus Fruits: Final Estimates by States, 2003-2007, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service, Statistical Bulletin No. 1009.

Introduction: This bulletin presents final estimates, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2003 through 2007. Bearing acreage, yield, utilized production, price, and value data were published during calendar years 2004-2008 in periodic ASB reports. Data included in this publication provide a historic record and a benchmark for current estimates.

Procedures: Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2007 Census of Agriculture. Other data considered included marketing agreement records, recorded truck and rail movement, quantities inspected, quantities used by processors, and the latest citrus surveys. The current acreage was evaluated with historic totals to ensure comparability with past Census relationships. The 2003-2007 estimates shown herein are considered final and will not be revised again.

At the National level, bearing acreage estimates were revised for early, midseason and navel oranges, Valencia oranges, all oranges, grapefruit, lemons, tangerines, and all citrus. Revisions were mainly attributable to revised bearing acreage estimates at the State level for California and Arizona. A summary of the revisions is outlined on the following page.

Historic Estimates: Estimates of citrus fruits for earlier years are available in the following Statistical Bulletins: No. 997 for 1996-97 to 2001-02, No. 961 for 1991-92 to 1996-97, No. 899 for 1986-87 to 1991-92, No. 796 for 1981-82 to 1986-87, No. 712 for 1977-78 to 1981-82, No. 643 for 1974-75 to 1977-78, No. 579 for 1969-70 to 1974-75, No. 493 for 1964-65 to 1969-70, No. 380 for 1909-10 to 1964-65.

Marketing Year Average Prices and Value of Production

State level marketing year average (MYA), or price per box, for fresh and processed sales are the weighted average of monthly sales that occur during a crop's marketing season, adjusted to the packinghouse-door level. The "all" sales MYA price is derived by dividing the "all" sales value by the "all" sales boxes. MYA prices at the U.S. level for commodities with different State box weights are computed as follows:

$$\text{Fresh Market MYAP} = \frac{\Sigma(\text{State Fresh Value} * \text{State Box Weight})}{\Sigma(\text{State Fresh Boxes} * \text{State Box Weight})}$$

$$\text{Process Market MYAP} = \frac{\Sigma(\text{State Process Value} * \text{State Box Weight})}{\Sigma(\text{State Process Boxes} * \text{State Box Weight})}$$

$$\text{"All" Sales MYAP} = \frac{\Sigma(\text{State All Value} * \text{State Box Weight})}{\Sigma(\text{State All Boxes} * \text{State Box Weight})}$$

For commodities with the same box weights across all States, the U.S. MYAs are derived by dividing the sum of States' values by the sum of States' boxes.

U.S. value of production for a given commodity is the sum of the State's values for that commodity. The State level value of production for each commodity is computed as follows:

$$\text{Fresh Market Value} = \text{Fresh Market MYAP} * \text{Fresh Market Boxes}$$

$$\text{Process Market Value} = \text{Process Market MYAP} * \text{Process Market Boxes}$$

$$\text{"All" Sales Value} = \text{Fresh Market Value} + \text{Process Market Value}$$

Citrus prices are based on weighted average F.O.B. packed prices received for fresh fruit and weighted average prices received at the processing plant door for processing fruit. Equivalent returns for fresh and processed fruit are calculated at the packinghouse-door level by deducting sorting, grading, packing, cooling, marketing, and other costs from the two base prices. In some cases, this results in negative returns.

Electronic Publications: These bulletins will be available **free of charge** on the Internet from the NASS Home Page at: www.nass.usda.gov/, in either text, PDF, or CSV format. From the Home Page select the “Publications” button, ” then “Statistical Bulletins” at the bottom of the page.

Printed Copies: Printed copies of the bulletins may be ordered by calling the Sales Order Desk toll free at 1-800-999-6779. Costs for printed copies of the publications range from \$15.00 to \$50.00. Visa, MasterCard, checks, or money orders are acceptable for payment.

Agricultural Statistics Database - Quick Stats: Selected State, U.S. and County information is available in an online database **free of charge**. The database allows custom extracts based on commodity, year, state and other selection criteria and produces an output file compatible for updating databases and spreadsheets. The database can be accessed from the NASS Home Page at: www.nass.usda.gov/.

Agricultural Census Publications: The U. S. Department of Agriculture's National Agricultural Statistics Service (NASS) releases preliminary national and state data from the 2007 Census of Agriculture and final data for Puerto Rico on February 4, 2009.
