Summary

Sheep and Goats: Final Estimates by State, 2014-2018, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service, Statistical Bulletin No. 1056.

Introduction: This bulletin presents final estimates, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2014 through 2018. Sheep and goat inventory, market sheep, lamb crop, sheep and lamb death loss, farm slaughter, wool and mohair production were published during calendar years 2014-2018 in periodic ASB reports.

Procedures: Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2017 Census of Agriculture. Other data series considered included slaughter data, shipment records, imports, and exports. Inventory levels and lamb crops were compared to historic totals. The 2014-2018 estimates shown herein are considered final and will not be revised again.

Revisions to United States estimates of January 1, 2014-2018 sheep and lamb inventories and goat and kid inventories are included below:

Year	Sheep inventory			All goat inventory

Agricultural Census Publications: The U. S. Department of Agriculture's National Agricultural Statistics Service (NASS) will release several products from the 2017 Census of Agriculture on April 11, 2019. The Census is the leading source of statistics about the Nation's agricultural production and the only source of consistent, comparable data at the county, state, and national levels. The Census includes all places from which \$1,000 or more of agricultural products, including government payments, were produced and sold, or normally would have been sold, during the census year. Census publications also include demographic items such as sex of producer, residence on or off the farm, days worked off farm, years present on farm, age group categories, race, and number of persons living in each household.
