Direct Hay Weighted Average Report for week ending 9/3/2021

Volume			
	This Week	Last Reported (8/16/2021)	Last Year
<b>Tons:</b>			
Hay	720	180	424
Total	720	180	424
<b>Bales:</b>			
Hay	280	720	0
Total	280	720	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report on 8/20/2021: Hay trade remains slow to steady across the state. With hot and dry weather, yields in hay production begins to slow. According to the USDA, hay supplies are tightening, which is expected to cause an increase in prices this fall. Corn harvest has started in many areas across the state as grain prices remain steady to some lower with the hurricane weather slowing down export movements. With higher than normal feed prices expected this fall, producers will be looking for cheaper feed rations. Grinding quality hay has slowed down with the influx of silage. Scattered rain and cooler temperatures are forecasted for the upcoming weekend.

\*\*\*Due to limited sales and price changes this report will be released bi-weekly until more volume of hay is moving.\*\*\*

\*\*\* The next report release will be September 17th\*\*\*

Central						
Hay (Conventional)						
<b>Alfalfa/Grass Mix - Good (Trade/Per Ton)</b>
