Direct Hay Weighted Average Report for week ending 10/15/2021

Volume			
	This Week	Last Reported (9/27/2021)	Last Year
Tons:			
Hay	165	440	364
Total	165	440	364
Bales:			
Hay	400	400	0
Total	400	400	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report on 10/1/2021: Hay remains steady for much of the state with good demand, but movement continues to remain slow. With the feed cost continuing to raise, hay becomes the main feed resource for the producer. If this continues, we should see an increase of trade in the near future. With low milk prices, dairies have continued to move to cheaper feed rations. We have received much needed rainfall in parts of our state, but according to the Mesonet we are still mainly in a moderate to severe drought in most of the state.

Due to limited sales and price changes this report will be released bi-weekly until more volume of hay is moving.

*** The next report release will be October 29th.***

Central						
Hay (Conventional)						
Alfalfa - Premium (Trade/Per Ton)						
	<u>Qty</u>	<u>Price Range</u>	<u>Wtd Avg</u>	<u>Freight/Use</u>	<u>Description</u>	<u>Crop Age</u>
Large Square 4x4	85	180.00	180.00	F.O.B.
