Direct Hay Weighted Average Report for week ending 9/17/2021

Volume			
	This Week	Last Reported (8/30/2021)	Last Year
Tons:			
Hay	1010	720	1650
Total	1010	720	1650
Bales:			
Hay	380	280	168
Total	380	280	168

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report on 9/3/2021: Hay trade remains steady with some increased trades in lower quality hay. Most of the state is hot and dry and hay production is winding down. As quality hay supply tightens, and demand begins increasing prices remaining steady to some higher on a light test. With low milk prices, dairies have moved to cheaper feed rations. As corn and soybean harvest wraps up, winter wheat crops will be planted soon. According to Mesonet, over half of the state is abnormally dry, with warm temperatures and little rain in the forecast.

Due to limited sales and price changes this report will be released bi-weekly until more volume of hay is moving.

*** The next report release will be October 1st.***

Central						
Hay (Conventional)						
Alfalfa - Premium/Supreme (Contract (Trade)/Per Ton)						
	<u>Qty</u>	<u>Price Range</u>	<u>Wtd Avg</u>	<u>Freight/Use</u>	<u>Description</u>	<u>Crop Age</u>
