

Raisins: World Markets and Trade

Global Raisin Production Up Marginally

Global raisin production for 2013/14 is forecast at nearly 1.2 million metric tons (tons), up just 3 percent from the previous year as gains in the United States, China and Afghanistan more than offset losses in Turkey, South Africa and Iran. Consumption is forecast higher for the second consecutive year. Exports are forecast virtually unchanged, while ending stocks continue to be dominated by the United States as inventories expand.

U.S. production is forecast to expand 20 percent to 360,000 tons, the highest in over 10 years, based on record yields as reported in the California Raisin Grape Objective Measurement Report. Following three years of falling exports, shipments are forecast to rebound nearly 15 percent to 140,000 tons due to reduced competition from Turkey and Iran in markets such as the European Union, China and Canada. With supply outpacing demand four consecutive years, ending stocks are forecast at a decade high 139,000 tons.

U.S. Raisin Exports Forecast Higher on Reduced Competition

Turkey's production is forecast to decline 15 percent to 240,000 tons due to a spring freeze that lowered yields in most growing regions. With lower available supplies, exports are expected to fall a similar amount as most of the harvest is shipped to the European Union.

China's production is forecast to increase 10 percent to 165,000 tons on higher yields following favorable weather in Xingjiang, the largest producing region. Since domestic consumption accounts for a vast majority of the harvest, exports are forecast only slightly higher at 35,000 tons.

Chile's production is forecast up 7 percent to 76,000 tons based on a higher proportion of table grapes being diverted to raisins. Nearly all the harvest is destined for export markets such as the European Union, the United States and Mexico.

South Africa's production is forecast 20 percent lower to 45,000 tons as output returns to normal following last year's spike, which had a large quantity of rain-damaged grapes diverted to raisins. Despite ample stocks, exports are expected to slip as some producers hold onto stocks rather than reduce prices.

Revised 2012/13

World **production** is virtually unchanged from the September 2012 estimate of 1.15 million tons.

- China is revised down 25,000 tons to 150,000 as fewer grapes were diverted to raisins.
- Iran is revised up 20,000 tons to 175,000 on higher yields.

World **exports** are nearly unchanged at 738,000 tons.

- Iran is revised up 20,000 tons to 145,000 on larger exportable supplies.
- Turkey is revised up 22,000 tons to 247,000 on stronger European demand as well as larger exportable supplies.
- United States is revised down 16,000 tons to 124,000 due to lower-than-anticipated shipments to Europe and Canada.
- Afghanistan is cut 13,000 tons to 17,000 on smaller exportable supplies.
