Direct Hay Weighted Average Report for week ending 4/16/2021

Volume				
	This Week	Last Reported (4/5/2021)	Last Year	
Tons:				
Hay	725	725	0	
Straw	25	25	0	
Total	750	750	0	
Bales:				
Straw	25	25	0	
Total	25	25	0	

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week: Few reported sales this week, alfalfa hay rather steady. Moderate demand for alfalfa, best demand remains from out of state dairies for large squares of higher testing alfalfa. Light demand from in state buyers as the mild winter reduced the need for supplemental hay feeding. Light demand for corn stalks and straw, again due to the mild winter as cattle did not need the bedding that they normally would. Colder weather set in across the state this week, stopping any green up and growth of alfalfa and grass. Snow fell in Western SD at midweek as temps remain much below normal. Area hay auctions still seeing large volumes of hay being offered as the supply remains plentiful.
