

# Midwest Regional Organic Grain and Feedstuffs Report

Agricultural Marketing Service  
Livestock, Poultry, and Grain Market News

July 28, 2021

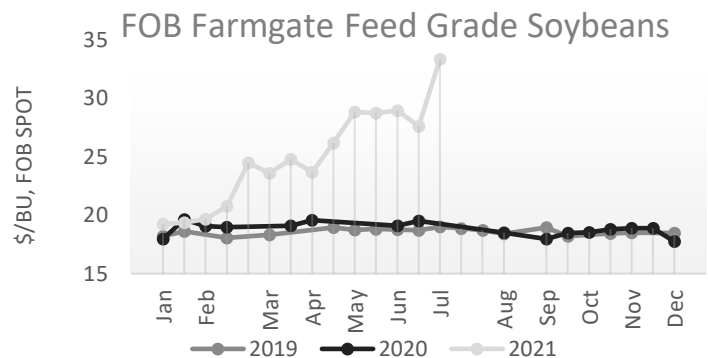

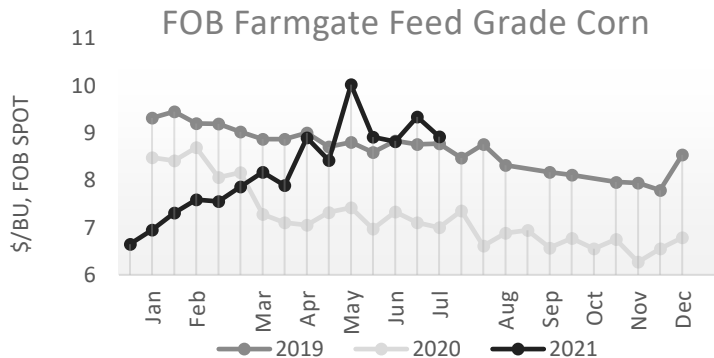

**Midwest Region States:** Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

## Grain and Feedstuffs Market Trend

Compared to last period: Organic feed corn trade active on good demand, trading 42 cents lower FOB and 29 cents higher delivered. The bulk of forward contracting for Q3 and Q4 2021 delivery. Organic feed soybeans trade activity light on very good demand, trading 5.76 higher FOB and 1.88 higher delivered. Few forward contracts, all for Q4 2021 delivery. Organic feed wheat trade activity moderate on moderate to good demand, trading 64 cents higher FOB. Few forward contracts for Q3 2021 delivery. Organic feed barley trade activity light on moderate demand. No comparable trades from the prior period to trend. Organic feed soybean meal trade activity light on very good demand, trading 49.37 lower FOB. Crushers are struggling to find soybeans available for purchase. The next available report will be Wednesday, August 11, 2021.

Livestock, Poultry, and Grain Market News

July 28, 2021

## Current Midwest Drought Summary (July 20, 2021)

An axis of heavy rain stretched from southern Missouri to northern Ohio. Secondary areas of locally heavy showers extended from Iowa and southeastern Minnesota to Michigan. The Midwestern rain intersected some existing areas of dryness (D0) and moderate to extreme drought (D1 to D3), resulting in some reductions in coverage. Some of the most dramatic improvements occurred across central Wisconsin and northern Lower Michigan. From July 13-15, more than 2 inches of rain soaked La Crosse, Wisconsin, and Traverse City, Michigan. Oshkosh, Wisconsin, received 3.34 inches. In contrast, little or no rain fell during the drought-monitoring period around Lake Superior and in central and northern Minnesota, where coverage of severe to extreme drought (D2 to D3) was greatly expanded. A broad array of indicators and indices, including streamflow, soil moisture, the Vegetation Health Index, the Evaporative Demand Drought Index, and the Standardized Precipitation Index, have shown that very serious drought conditions exist at a variety of times scales across much of northern and central Minnesota. On July 18, Minnesota led the Midwest with 63% of its pastures rated in very poor to poor condition, along with 42% of its spring wheat, 34% of its oats, 33% of its barley, 18% of its corn, and 17% of its soybeans. Minnesota also led the Midwest on that date, according to the U.S. Department of Agriculture, with topsoil moisture rated 78% very short to short.
