Midwest Organic Grain and Feedstuffs Bi-Weekly Report

Agricultural Marketing Service

Livestock, Poultry, and Grain Market News

April 7, 2021

Current Midwest Drought Summary (March 30, 2021)

Widespread precipitation (1 to 2.5 inches) fell throughout much of the central and eastern Corn Belt. Abnormal dryness (D0) and moderate drought (D1) were decreased in spatial coverage across Illinois and Indiana. Despite this rainfall during late March, soil moisture (below the 20th percentile) and SPIs at various time scales support maintaining D1 across parts of northern Indiana, northern Ohio, and lower Michigan. Northeast Illinois and eastern Indiana missed out on the heavier rainfall during late March, prompting a slight expansion of D0 for these areas. Also, D1 was added to northeast Ohio based on increasing 90-day precipitation deficits, 90-day SPIs, and soil moisture below the 20th percentile. A 1-category improvement was made to eastern Minnesota and western Wisconsin where more than 1.5 inches of rainfall occurred this past week. 1 to 2 inches of rainfall resulted in a reduction in D0-D2 across central Iowa. However, SPIs dating back 9 months continue to support D2-D3 long-term drought for northwest Iowa.
