Livestock, Poultry, and Grain Market News

September 8, 2021

## Current Midwest Drought Summary (August 31, 2021)

On this week's map, widespread one-category improvements were made across Iowa, Minnesota, and Wisconsin in response to beneficial rainfall accumulations observed during the past week with totals ranging from 2 to 12+ inches. The heaviest accumulations were observed across areas of northeast Iowa, where the 7-day average streamflow on the Cedar River at Janesville, Iowa was in the 99th percentile, according to the USGS. Elsewhere in the region, modest rainfall during the past week (1 to 2 inches) led to reductions in areas of Abnormally Dry (D0) in Illinois, Indiana, Kentucky, and Ohio. Average temperatures for the week were well above normal across most of the region (2 to 10+ deg F). According to the NOAA NCEI's climatological rankings, the Upper Midwest Climate Region observed its 13th driest May-July period on record. At a statewide level, Minnesota observed its 2nd driest July and May-July on record. According to recent media reports, the dry conditions in northern Minnesota have been negatively impacting fish populations as well as wildlife and forest health.
