Commercial Vegetables

U. S. DEPARTMENT OF AGRICULTURE
AGRICULTURAL MARKETING SERVICE
CROP REPORTING BOARD

Washington, D. C. December 20, 1954

PRODUCTION OF ALL COMMERCIAL VEGETABLES FOR FRESH MARKET AND PROCESSING 1935 - 1954

The Crop Reporting Board of the Agricultural Marketing Service makes the following report of the commercial production of all vegetables for fresh market and processing, 1935-54. These estimates are based upon reports and data furnished by growers, shippers, commercial processors, State statisticians and co-operating agencies. This report supplements the "1954 Annual Summary, Commercial Vegetables for Fresh Market," Report TC-54: 1203-34, and the "1954 Annual Summary, Vegetables for Commercial Processing," Report TC-54: 1235-48, which relate to the 29 principal vegetables (28 for fresh market and 11 for processing) covered in the regular program of monthly reports.

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL MARKETING SERVICE
WASHINGTON, D. C.

TC-54: 1249 December 20, 1954

The table on page 1 shows the commercial fresh market and processing estimates previously published for the 29 principal vegetables, together with commercial fresh-market and processing estimates for all vegetables, 1935-54. In both series of estimates, the processing figures are the same since these include only the 11 main processing vegetables for which coverage is complete. For crops other than the 11 for which processing production is shown separately, the quantities processed are included in the fresh-market estimates; but, except for broccoli, brussels sprouts and cauliflower, the quantities processed are only a small percentage of the total production.

The summary table on page 1 and the commodity tables on pages 3-5 incorporate recent revisions in the production on a tonnage basis estimated for cantaloups (including honey dews, honey balls, etc.) for the years 1935 to date. This change was based on a study of containers which revealed a need for an upward adjustment in the approximate net weights used for cantaloups and honey dews. This change has not affected the level of production of these crops as published in crates but the production converted to a tonnage basis has been increased. Price and value estimates are not changed.

The differences in production of the 29 principal vegetables, published in the regular program of monthly reports, and the production of all vegetables shown in this report are attributable to the inclusion of minor crops not previously estimated, and of minor-producing States and greenhouse production not covered in the estimates of the 29 principal vegetables. These differences all occur in the fresh-market estimates, viz:

Item	1954 Fresh-Market Production	
	Tons	Percent
Principal Vegetables		
Major producing States covered in the program of monthly reports	10,174,700	82
Minor producing States not covered in the program of monthly reports and greenhouse production in all States	706,500	6
Minor Vegetables		
Not covered in the program of monthly reports	1,570,000	12
ALL COMMERCIAL VEGETABLES	12,451,200	100

For 1954 the regular program of monthly reports covered 82 percent of the estimated fresh-market production of all vegetables. The coverage is about the same as for other recent years.

The estimated fresh-market production of all vegetables shown in this report include quantities not marketed because of low prices or other economic factors. Estimates of such economic abandonment for the crops and States covered in the regular program of monthly reports will be found in Report TC-54: 1203-34. Estimates of economic abandonment are not available for principal vegetables in minor producing States nor for minor vegetables. These fresh-market estimates for all vegetables have been prepared on a national basis for production only. Figures for individual crops are shown in the table on pages3-5. State and seasonal-group figures are not available; neither are figures available on acreage or value.

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL MARKETING SERVICE
WASHINGTON, D. C.

TC-54: 1249 . December 20, 1954

FOOTNOTES

Table on page 1:

1/ The 29 vegetable crops (28 for fresh market and 11 for processing) for which State estimates are published in the regular program of monthly reports. For list of crops included and comparable figures on acreage and value see Reports TC-54: 1203-34 and TC-54: 1235-48. Production for fresh market includes some quantities not marketed because of low prices or other economic factors.

2/ Includes in addition to the 28 fresh-market vegetables covered in the regular program of reports, allowances for production for sale of minor vegetables in all States, of principal vegetables in relatively unimportant producing States, and of greenhouse production in all States. For a few crops includes production for processing. Does not include production from farm and nonfarm gardens. Production by States and acreage and value data are not available.

3/ The 11 principal processing vegetables covered in the regular program of reports. Production for processing, not covered by these estimates for the 11 principal processing vegetables, is included in the fresh-market estimates.

Table on pages 3-5:

1/ Total commercial production for fresh market for all States. Includes greenhouse production. Does not include production from farm and non-farm gardens. Includes quantities not marketed because of low prices or other economic factors.

2/ Prior to 1939 includes production for processing in States other than California.

3/ In the shell.

4/ Sprouting broccoli only. Does not include broccoli rabe nor heading broccoli, also called cauliflower-broccoli. Includes production for processing.

5/ Includes production for processing.

6/ Includes production for dehydration, 1943-45.

7/ Includes Honey Ball and Honey Dew melons, as well as Casabas, Persians and other muskmelons.

8/ Mostly for fresh market, but includes production for processing and for dehydration.

9/ Includes heading broccoli or cauliflower-broccoli. Includes production for processing.

10/ Does not include green field corn.

11/ Includes chicory and endive.

12/ Includes production for processing and for dehydration.

13/ Includes Romaine.

14/ Dry onions only. Green onions included with minor vegetables. Mostly for fresh market but includes production for processing and for dehydration.

15/ Includes production for processing in those States for which separate estimates of fresh-market and processing production are not prepared.

16/ Includes Chinese cabbage, Swiss chard, collards, dandelion greens, mustard greens, turnip greens, horseradish, kohlrabi, okra, green onions, parsley, parsnips, hot peppers, pumpkins, radishes, rhubarb, rutabagas, salsify, squash, turnips and other miscellaneous vegetables. Includes production for processing.

UNITED STATES DEPARTMENT OF AGRICULTURE

CROP REPORTING BOARD
WASHINGTON, D. C.

TC-54: 1250
December 27, 1954

SUMMARY REPORT
PRINCIPAL COMMERCIAL VEGETABLES FOR FRESH MARKET AND PROCESSING
ACREAGE, PRODUCTION AND VALUE
1953 AND 1954

The Crop Reporting Board makes the following summary report of the acreage, production, and value of principal commercial vegetables for fresh market and commercial processing, based on reports and data furnished by crop correspondents, commercial processors, field statisticians, and cooperating agencies.

UNITED STATES DEPARTMENT OF AGRICULTURE

Continued on page 3.

Acreage, production and value, continued

CROP	ACREAGE 1/		PRODUCTION (Equiv. Tons)		VALUE 2/	
	1953	1954	1953	1954	1953	1954
	Acres	Acres	Tons	Tons	1,000 dol.	1,000 dol.
Mint for oil	57,650	59,200	1,100	1,200	10,787	11,540
Peppermint	38,000	37,000	700	700	6,336	7,873
Spearmint	19,650	22,200	400	500	4,451	3,667
Commercial early Potatoes	274,900	210,100	3/2171500	1,676,600	68,169	84,734
Strawberries	112,000	109,300	223,800	5/ 213,700	86,690	83,026

1/ Acreage of fresh market crops is acreage available for harvest, including mature acreage abandoned or only partially harvested because of low prices or other economic factors. Acreage of crops for processing is acreage harvested.

2/ Value is for the marketing season or crop year and does not correspond to calendar year income.

3/ In the shell. Equivalent production shelled as follows: 1953, 11,450 tons; 1954, 10,800 tons. 2 pounds of beans in the shell produce approximately 1 pound shelled beans.

4/ Shelled basis.

5/ Includes some quantities not marketed and excluded in computing value: snap beans, 2,200 tons in 1953 and 900 in 1954; beets 4,600 tons in 1953 and 6,900 in 1954; cabbage, 126,200 tons in 1953 and 76,400 in 1954; cantaloups, 800 tons in 1954; carrots, 15,500 tons in 1953 and 14,800 in 1954; celery, 7,400 tons in 1953 and 17,000 in 1954; cucumbers, 1,500 tons in 1953 and 10,700 in 1954; escarole, 5,200 tons in 1954; kale, 2,300 tons in 1953 and 400 in 1954; lettuce 8,800 tons in 1953 and 10,500 in 1954; onions, 68,200 tons in 1953; green peppers, 3,500 tons in 1954; spinach, 800 tons in 1953 and 500 tons in 1954; tomatoes, 5,100 tons in 1954; watermelons, 6,200 tons in 1953 and 49,400 tons in 1954; potatoes, 153,400 tons in 1953; strawberries, 2,100 tons in 1954.

6/ Includes production for processing. Carrots, celery, garlic, and onions for dehydration included.

7/ In the shell. Equivalent production shelled as follows: 1953, 8,440 tons; 1954, 8,520 tons. $2\frac{1}{2}$ pounds of peas in the shell produces approximately 1 pound shelled peas.
