Agricultural Prices

Released March 31, 2023, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, United States Department of Agriculture (USDA).

## February Prices Received Index Up 1.7 Percent

The February Prices Received Index 2011 Base (Agricultural Production), at 126.7, increased 1.7 percent from January and 5.7 percent from February 2022. At 120.7, the Crop Production Index was up 2.3 percent from last month and 5.6 percent from the previous year. The Livestock Production Index, at 133.3, decreased 2.3 percent from January, but increased 5.6 percent from February last year. Producers received higher prices during February for soybeans, corn, cattle, and cauliflower but lower prices for market eggs, milk, celery, and strawberries. In addition to prices, the volume change of commodities marketed also influences the indexes. In February, there was increased monthly movement for cattle, milk, broilers, and greenhouse \& nursery and decreased marketing of corn, soybeans, wheat, and tobacco.

## February Prices Paid Index Unchanged

The February Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 138.9, is unchanged from January 2023 but up 5.2 percent from February 2022. Lower prices in February for nitrogen, diesel, supplements, and other machinery offset higher prices for feeder cattle, concentrates, feed grains, and other services.

## February Prices Received by Farmers

Crop production: The February index, at 120.7, is 2.3 percent higher than January and 5.6 percent higher than February 2022. The grain \& oilseed and other crop index increases more than offset the fruit \& tree nut and vegetable \& melon index decreases.

Grain and oilseed: The February index, at 116.7, is up 2.7 percent from January and 6.5 percent from February 2022. Oilseed and feed grain index increases more than offset the lower food grain index.

Feed grain: The February index, at 113.4 , increased 2.5 percent from last month and 12 percent from a year ago. The corn price, at $\$ 6.80$ per bushel, is up 16 cents from last month and 71 cents from February 2022.

Food grain: At 120.4, the index for February decreased 2.1 percent from the previous month but increased 0.1 percent from a year ago. The February price for all wheat, at $\$ 8.53$ per bushel, is 29 cents lower than January and 63 cents lower than February 2022. The February price for rice, at $\$ 18.50$ per cwt, is 60 cents lower than January but $\$ 2.90$ higher than February 2022.

Oilseed: At 120.5 , the index for February increased 4.0 percent from January and 2.4 percent from February 2022. The soybean price, at $\$ 15.10$ per bushel, is 60 cents higher than January and 40 cents higher than February a year earlier.

Fruit and tree nut: The February index, at 141.8 , is down 7.8 percent from January but up 6.2 percent from a year earlier. Price decreases during February for strawberries, lemons, oranges, and grapefruit more than offset price increases for pears.

Vegetable and melon: At 155.0 , the index for February is down 9.4 percent from the previous month but up 19 percent from February 2022. Price decreases during February for celery, broccoli, lettuce, and onions more than offset price increases for cauliflower, sweet corn, and cucumbers.

Other crop: The February index, at 110.9, is up 2.6 percent from the previous month and 0.2 percent from February 2022. The all hay price, at $\$ 231.00$ per ton, is $\$ 3.00$ higher than January and $\$ 36.00$ higher than February 2022. At 79.8 cents per pound, the price for upland cotton is 0.4 cents lower than January and 18.8 cents lower than February 2022.

Livestock production: The index for February, at 133.3, decreased 2.3 percent from the previous month but increased 5.6 percent from February a year earlier. Dairy and poultry \& egg index decreases more than offset the higher meat animal index.

Meat animal: At 124.3, the February index increased 1.7 percent from the previous month and 7.0 percent from a year earlier. At $\$ 59.60$ per cwt, the February hog price is $\$ 1.10$ higher than January but $\$ 9.00$ lower than a year earlier. The February beef cattle price of $\$ 158.00$ per cwt is $\$ 2.00$ higher than the previous month and $\$ 21.00$ higher than February 2022.

Dairy: The index for February, at 107.5, is down 6.4 percent from the previous month and 13 percent from February a year ago. The February all milk price of $\$ 21.60$ per cwt is $\$ 1.50$ lower than January and $\$ 3.10$ lower than February 2022.

Poultry and egg: At 180.0, the February index decreased 4.6 percent from January but increased 17 percent from February 2022. The February market egg price, at $\$ 2.46$ per dozen, is 46.0 cents lower than January but $\$ 1.25$ higher than February 2022. The February broiler price, at 70.8 cents per pound, is 0.3 cent higher than January but 3.9 cents lower than a year ago. At $\$ 1.17$ per pound, the February turkey price is 3.0 cents lower than the previous month but 27.2 cents higher than February 2022.

Food Commodities: The index, at 132.2 , increased 0.1 percent from the previous month and 5.4 percent from February 2022.

## Parity Price Overview

Parity prices, based on data from January 2022, and adjusted base price data from which parity prices are computed are presented in the tables on the following pages. Parity prices are computed under the provisions of Title III. Subtitle A, Section 301(a) of the Agricultural Adjustment Act of 1938 as amended by the Agricultural Acts of 1948, 1949, 1954, and 1956.

The parity prices shown in this report are based on the provisions of the amended Act. Briefly, the actual method of computation is as follows:
a. The average of prices received by farmers for individual commodities for the 10 preceding years is calculated (for 2022, the 10-average includes the years 2012-2021). An allowance for unredeemed loans and other supplemental payments resulting from price support programs, such as the deficiency payments for grains and cotton, is included for those commodities for which applicable.
b. This 10 -year average is divided by the average of the Index of Prices Received by Farmers for the same 10 preceding calendar years, adjusted to include an allowance for unredeemed loans and other supplemental price support operations, to give an "adjusted base price".
c. Parity prices are computed by multiplying the "adjusted base prices" by the current Parity Index (the Index of Prices Paid by Farmers, including Interest, Taxes, and Wage Rates, 1910-1914=100).

Parity prices are calculated in terms of prices received by farmers in the local markets in which they ordinarily sell. This means that the parity prices apply to the average of all classes and grades of the commodity as sold by all farmers in the United States, except as otherwise specified. Fruits and vegetables for fresh use and for processing are usually considered separate commodities and separate parity prices are calculated. The Agricultural Marketing Agreement Act of 1937 provided for parity prices for certain commodities covered by a marketing agreement or order program. Under present legislation, United States parity prices, with appropriate adjustments where needed, may be used for the purpose of this Act.

## Commodity Parity Prices and Price as Percent of Parity Price - United States: February 2023 with Comparisons

[Parity prices are computed under the provisions of Title III, Subtitle a, Section 301 (a) of the Agricultural Adjustment Act of 1938 as amended by the Agricultural Acts of 1948, 1949, and 1956. See February Agricultural Prices for details on adjusted base price and parity price computations. Parity data not available for blank cells. Primary source of data for livestock and milk prices is United States Department of Agriculture's Agricultural Marketing Service]

## Reliability of Prices Received Estimates

Definition: Prices received represent sales from producers to first buyers. They include all grades and qualities. The average commodity price from the survey multiplied by the total quantity marketed theoretically should give the total cash receipts for the commodity.

Survey procedures: Primary sales data used to determine grain prices were obtained from probability samples of about 1,900 mills and elevators. These procedures ensure that virtually all grain moving into commercial channels has a chance of being included in the survey. Generally, States surveyed account for 90 percent or more of total United States production. Livestock prices are obtained from packers, stockyards, auctions, dealers, and market check data from AMS-USDA, private marketing organizations, and state commodity groups and agencies. Inter-farm sales of grain and livestock are not included since they represent very small percentages of the total sales. Grain marketed for seed is also excluded. Fruit and vegetable prices are obtained from sample surveys and market check data from AMS-USDA, private marketing organizations, state agencies, and universities.

Summary and estimation procedures: Survey quantities sold are expanded by strata to state levels and used to weight average strata prices to a state average. State prices are then weighted to a United States price based on expanded sales. Recommendations are prepared by the Regional Field Offices and reviewed by the Agricultural Statistics Board in Washington, D.C. State recommendations are reviewed for reasonableness with survey data, other States, and recent historic estimates.

Revisions: In general, revisions are made during annual commodity market year estimation time, following five-year Census revisions, or when later information is received. Revisions are published in monthly issues of Agricultural Prices.

Reliability: United States price estimates based on probability surveys generally have a sampling error of less than one percent for the major commodities such as corn, wheat, soybeans, cotton, and rice. Current methods of summarization for non-probability commodities are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors at around five percent. Any non-sampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these non-sampling errors.

Program Changes: See Price Program Links at the end of this report for details on program changes to the Prices Program methodology.

## February Prices Paid by Farmers

The February Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 138.9, is unchanged from January 2023 but up 5.2 percent from February 2022.

Production: The February index, at 137.6 , is down 0.1 percent from January but up 5.7 percent from last year. Lower prices for nitrogen, diesel, supplements, and other machinery more than offset higher prices for feeder cattle, concentrates, feed grains, and other services.

Feed: At 144.5, the February index increased 0.3 percent from January and 9.0 percent from last February. Since January, higher prices for concentrates, feed grains, complete feeds, and hay \& forages more than offset lower prices for supplements.

Livestock and poultry: The February index, at 136.4, increased 2.1 percent from January and 8.6 percent from last year. Since January, higher prices for feeder cattle more than offset lower prices for feeder pigs. The February feeder cattle price, at $\$ 189.00$ per cwt, is up $\$ 6.00$ per cwt from the January price. The February feeder pigs price, at $\$ 211.00$ per cwt, is down $\$ 10.00$ per cwt from January.

Fertilizer: The index for February, at 119.4, is down 4.7 percent from January and 6.4 percent from February a year ago. Since January, prices are lower for nitrogen, mixed fertilizer, and potash \& phosphate.

Chemicals: The February index, at 141.2, is unchanged from January but up 23 percent from last February.
Fuels: At 93.6, the February index is down 2.3 percent from January and 2.3 percent from February 2022. Compared with January, prices are lower for diesel and LP gas but higher for gasoline.

Machinery: The index for February, at 176.3, decreased 1.0 percent from January but increased 6.6 percent from last February. Compared with last month, prices are lower for other machinery and tractors but unchanged for self-propelled machinery.

Consumer Price Index: The February 2023 Consumer Price Index for All Urban Consumers (CPI-U), as issued by the Bureau of Labor Statistics, increased 6.0 percent over the last 12 months to an index level of 300.840 (1982-1984=100). For the month, the index increased 0.6 percent prior to seasonal adjustment.

[^4]Feed Price Ratios - United States: February 2023 with Comparisons

| Feed price ratio ${ }^{1}$ | February 2022 | January 2023 | February 2023 |
| :---: | :---: | :---: | :---: |
| Broiler-feed: pounds of broiler grower feed equal in value to 1 pound of broiler, live weight ${ }^{2}$ | 4.5 | 4.1 | 4.0 |
| Market egg feed: pounds of laying feed equal in value to 1 dozen eggs ${ }^{3}$ | 8.5 | 19.6 | 16.0 |
| Hog-corn: bushels of corn equal in value to 100 pounds of hog, live weight | 11.3 | 8.8 | 8.8 |
| Milk-feed: pounds of $16 \%$ mixed dairy feed equal in value to 1 pound of whole milk ${ }^{4}$ | 2.06 | 1.73 | 1.58 |
| Steer \& heifer-corn: bushels of corn equal in value to 100 pounds of steer \& heifers, live weight $\qquad$ | 23.2 | 24.1 | 23.8 |
| Turkey-feed: pounds of turkey grower equal in value to 1 pound of turkey, live weight ${ }^{5}$ | 5.8 | 7.5 | 7.2 |

${ }^{1}$ Effective January 1995, prices of commercial prepared feeds are based on current United States prices received for corn, soybeans, alfalfa hay, and all wheat.
${ }^{2}$ The price of commercial prepared broiler feed is based on current United States prices received for corn and soybeans. The modeled feed uses 58 percent corn and 42 percent soybeans.
${ }^{3}$ The price of commercial prepared layer feed is based on current United States prices received for corn and soybeans. The modeled feed uses 75 percent corn and 25 percent soybeans.
${ }^{4}$ The price of commercial prepared dairy feed is based on current United States prices received for corn, soybeans, and alfalfa. The modeled feed uses 51 percent corn, 8 percent soybeans, and 41 percent alfalfa.
${ }^{5}$ The price of commercial prepared turkey feed is based on current United States prices received for corn, soybeans, and wheat. The modeled feed uses 51 percent corn, 28 percent soybeans, and 21 percent wheat.

## Reliability of Prices Paid Estimates

Definition: Prices paid by farmers represent the average costs of inputs purchased by farmers and ranchers to produce agricultural commodities. Conceptually, the average price when multiplied by quantity purchased should equal total producer expenditures for the item.

Survey procedures: The prices paid data are obtained from establishments that sell goods and services to farmers and ranchers. Annually, about 8,500 firms are randomly selected from lists by type of item sold with an average response rate in the range of $75-80$ percent. Firms are asked to report the price for the specified item "most commonly bought by farmers" or that was the "volume seller". Approximately 135 items are surveyed each March to represent all production input items purchased. The survey reference period for all items is the full preceding calendar year. Separate prices paid surveys are conducted for agricultural chemicals, fuels, feed, fertilizer, machinery, and seed.

Summary and estimation procedures: The annual March Prices Paid Survey is summarized as a non-probability survey. Average prices reported are aggregated to the region and United States level using weights available from expenditure data and other administrative sources. Price recommendations are prepared by the Regional Field Offices and Headquarters for review by the Agricultural Statistics Board in Washington, D.C. Also, the change in price level for individual items surveyed are combined to the regional and United States levels, and are published as prices paid indexes referenced to a specific base period. Prices paid indexes for new autos and trucks, building materials, farm supplies, motor supplies, and marketing containers are updated based on price changes measured in selected Bureau of Labor Statistics (BLS) indexes.

Revisions: Any revisions are published in the monthly and in annual issues of Agricultural Prices. The basis for revision must be supported by additional data that directly affect the level of the estimate. More revisions are likely for March when separate prices paid surveys are conducted, in lieu of BLS indexes, by the USDA to measure price change.

Reliability: Current methods of summarization for the March data are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors for major items around 10 percent. Any non-sampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these non-sampling errors.

Program Changes: See Price Program Links at the end of this report for details on program changes to the Prices Program methodology.

## Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:
> All reports are available electronically, at no cost, on the NASS web site: www.nass.usda.gov.
> Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit www.nass.usda.gov and click on "National" or "State" in upper right corner above "search" box to create an account and select the reports you would like to receive.
> Cornell's Mann Library has launched a new website housing NASS's and other agency's archived reports. The new website, https://usda.library.cornell.edu. All email subscriptions containing reports will be sent from the new website, https://usda.library.cornell.edu. To continue receiving the reports via e-mail, you will have to go to the new website, create a new account and re-subscribe to the reports. If you need instructions to set up an account or subscribe, they are located at: https://usda.library.cornell.edu/help. You should whitelist notifications@usdaesmis.library.cornell.edu in your email client to avoid the emails going into spam/junk folders.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@usda.gov.

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the basis of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.)

If you wish to file a Civil Rights program complaint of discrimination, complete the USDA Program Discrimination Complaint Form (PDF), found online at www.ascr.usda.gov/filing-program-discrimination-complaint-usda-customer, or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter to us by mail at U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, by fax (202) 690-7442 or email at program.intake@usda.gov.

Agricultural Prices Program and Survey
https://www.nass.usda.gov/Surveys/Guide to NASS Surveys/Prices/

[^0]:    (D) Withheld to avoid disclosing data for individual operations.

[^1]:    ${ }^{1}$ Marketings based on a survey of cotton buyers in the major producing States - Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, North Carolina, Tennessee, and Texas.
    ${ }^{2}$ Purchases by private firms and rice (rough equivalent) shipped by cooperatives.
    ${ }^{3}$ Other States include Arkansas, Louisiana, Mississippi, Missouri, and Texas.

[^2]:    Parity prices began January 2015.
    ${ }^{2}$ Seasonally adjusted price as percentage of parity price
    ${ }^{3}$ Wholesale extracted. Adjusted base price derived from state annual averages prices weighted by production. For 1982 through 1985 the national averages are the support prices.
    ${ }^{4}$ Equivalent packinghouse-door returns for California, New York, Oregon, and Washington. Price at point of first sale for other states.

[^3]:    ${ }^{1}$ Equivalent returns at processing plant door.
    ${ }^{2}$ Adjusted base price is carried forward from the previous year since current marketing year average price is not yet available.
    ${ }^{3}$ Equivalent returns at packinghouse door.
    ${ }^{4}$ Equivalent returns for bulk fruit at first delivery point.
    ${ }^{5}$ Equivalent packinghouse-door returns for California, New York (apples only), Oregon (except Peaches), and Washington. Price at point of first sale for other states.
    ${ }^{6}$ Based on "as sold" prices for fresh fruit in all states.
    ${ }^{7}$ FOB shipping point price.
    ${ }^{8}$ Relates to prices including average conditional payments per ton made under the sugar acts of 1937 and 1948. Crop deficiency and abandonment payments not included.
    ${ }^{9}$ Prices In-Shell basis except almonds which are shelled basis.
    ${ }^{10}$ Includes some processing.

[^4]:    ${ }^{1}$ Starting 2023, relative weights published to three decimals.
