Introduction

Noncitrus Fruits and Nuts: Final Estimates by States, 2002-2007, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service, Statistical Bulletin No. 1011.

Introduction: This bulletin presents final estimates, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2002 through 2007. Acreage, yield, production, price, and value data were published during calendar years 2003-2008 in periodic ASB reports. Data included in this publication provide a historic record and a benchmark for current estimates.

Procedures: Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2007 Census of Agriculture. Other data series considered included marketing agreement records, recorded truck and rail movement, quantities inspected, quantities used by processors, and the latest available fruit and nut inventory surveys. The current acreages were evaluated with historic totals to ensure comparability with past Census relationships. The 2002-2007 estimates shown herein are considered final and are not subject to further revisions. The exceptions are estimates for grapes and cranberries due to the limited availability of co-op data prior to the deadline for printing this publication. These estimates may be revised in following *Noncitrus Fruits and Nuts Summary* publications.

Shown below are the revisions at the National level for the major commodities that have multiple States in their respective programs.

Definition of Terms

Apples, Commercial Crop refers to orchards of 100 or more bearing age trees.

Bearing Acreage - An orchard, grove, or vineyard is considered bearing when it reaches an age when it can normally be expected to produce a commercially significant quantity of the crop. Bearing age is a function of many factors including variety, rootstock, year planted, etc. Bearing acreage is primarily based upon periodic orchard surveys. In non-survey years, bearing acreage is based on trends, county extension service data, end-of-year production surveys, and other indications.

Prices are a marketing year average for all methods of sale. For a crop sold for both fresh market and processing, the **Marketing Year Average Price (MYA)** is a weighted average of the fresh and processing price.

Prices for fresh fruit are the average prices producers receive at the point of first sale. This is commonly referred to as the **average price as sold**. Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the quantity sold. For example, in a given State, part of the fruit is sold free on board (F.O.B.) packed by growers, part is sold as bulk fruit at the packinghouse door, and some is sold retail at roadside stands. The fresh fruit **average price as sold** is a weighted average of the average price for each method of sale. The exception is fresh fruit sales in California, Washington, and New York (apples only) which are equivalent returns at packinghouse door. The equivalent packinghouse returns represent adjusted prices.

F.O.B. packed prices are adjusted to an equivalent incoming packinghouse door price by subtracting all costs that accumulate between the incoming packinghouse door and the F.O.B. price. These costs include grading, packing, inspecting fees, selling, and other costs.

Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door except for cranberries, California olives, and freestone peaches, which are priced at the first delivery point.

Crop value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts from these crops which are on a calendar year.

Total Production is the quantity actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested because of economic or natural reasons.

Unutilized Production is the difference between total and utilized production which is marketable fruit not harvested for economic or natural reasons and harvested fruit not sold or utilized.

Harvested not sold is fruit of marketable quality that was picked but not sold for various reasons. Harvested not sold amounts up to 2 percent of total production are considered normal seasonal losses and are excluded from total production. Reported values are above and beyond these normal seasonal losses.

Unharvested Production is marketable fruit produced, but not harvested for various reasons. Unharvested amounts up to 2 percent of total production are considered normal seasonal losses and are excluded from total production. Reported values are above and beyond these normal seasonal losses.

Utilization refers to first utilization, not necessarily final utilization. For example, frozen fruit includes some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity. Fruit graded-out from canning or freezing and utilized for juice is included with juice.

Utilized Production is the amount sold plus the quantities used at home or held in storage.

Yield per Acre is based on total production which includes unharvested production and fruit harvested but not sold due to marketing conditions.

State Value of Utilized Production and MYA Price Computations

The following procedure is used to compute State Values of Utilized Production and MYA Prices:

Fresh Market Value = Fresh Market MYA
Times
Fresh Market Utilization

Process Market Value = Process Market MYA
Times
Process Market Utilization

"All" Sales Value = Fresh Market Value
Plus
Process Market Value

"All" Sales MYA = "All" Sales Value
Divided By
"All" Sales Utilization

For commodities with components not identified by market channel, substitute breakdown name for fresh/processing market and use the same procedure.

U.S. MYA Price Computations

The following procedure is used to compute the U.S. MYA Prices:

Fresh Market MYA = Fresh Market Value For All States
Divided By
Fresh Market Utilization For All States

Process Market MYA = Process Market Value For All States
Divided By
Process Market Utilization For All States

"All" Sales MYA = Sales Value For All States
Divided By
Sales Utilization For All States

Electronic Publications: These bulletins will be available **free of charge** on the Internet from the NASS Home Page at: www.nass.usda.gov/, in either text, PDF, or CSV format. From the Home Page select the "Publications" button, then "Statistical Bulletins" at the bottom of the page.

Printed Copies: Printed copies of the bulletins may be ordered by calling the Sales Order Desk toll free at 1-800-999-6779. Costs for printed copies of the publications range from \$15.00 to \$50.00. Visa, MasterCard, checks, or money orders are acceptable for payment.

Agricultural Statistics Database - Quick Stats: Selected State, U.S. and County information is available in an online database **free of charge**. The database allows custom extracts based on commodity, year, state and other selection criteria and produces an output file compatible for updating databases and spreadsheets. The database can be accessed from the NASS Home Page at: www.nass.usda.gov/.

Agricultural Census Publications: The U. S. Department of Agriculture's National Agricultural Statistics Service (NASS) releases preliminary national and state data from the 2007 Census of Agriculture and final data for Puerto Rico on February 4, 2009. Census data include demographic items such as sex of operator, residence on or off the farm, days worked off farm, years present on farm, age group categories, race, and number of persons living in each household.

Assistance: For more information pertaining to this bulletin, call Crops Branch at (202) 720-2127. For assistance with general agricultural statistics or further information about NASS or its products and services, contact the **Agricultural Statistics Hotline** at **1-800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov .

ACCESS TO REPORTS!!

For your convenience, there are several ways to obtain NASS reports, data products, and services:

INTERNET ACCESS

All NASS reports are available free of charge on the worldwide Internet. For access, connect to the Internet and go to the NASS Home Page at: www.nass.usda.gov.
