Direct Hay Weighted Average Report for week ending 10/30/2020

Volume			
	This Week	Last Reported (10/19/2020)	Last Year
Tons:			
Hay	3367	1287	0
Total	3367	1287	0
Bales:			
Hay	0	50	0
Total	0	50	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week, all reported forages sold fully steady. Demand was good. Winter weather peaked around the corner for the second week in a row. Several areas in the Eastern part of the state received 6-10 inches of snow over the weekend with January type temperatures. A seasonal warmup is in the forecast for the next week and should melt off most of the snow at lower elevations. Few reports of producers finishing up 3rd cutting around Riverton and Powell. Quite a few reports of having a hard time finding transportation going to the Eastern part of the USA as loads of small and large squares go to Tennessee, Kentucky, Georgia and other states in the region. Producers are hoping this burden will ease up soon so they can start cleaning hay barns out. ***All sales are dollars per ton FOB the field or hay barn unless otherwise noted.

East						
Hay (Conventional)						
Alfalfa - Supreme (Trade/Per Ton)						
	<u>Qty</u>	<u>Price Range</u>	<u>Wtd Avg</u>	<u>Freight/Use</u>	<u>Description</u>	<u>Crop Age</u>
