Direct Hay Weighted Average Report for week ending 5/14/2021

	Volume		
	This Week	Last Reported (5/3/2021)	Last Year
Tons:			
Hay	100	150	0
Total	100	150	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week, all reported forages sold steady on a very thin test. Bulk of the hay sheds are cleaned out with a few spot loads still left to sell. Once again, producers are having a hard time finding trucks that will haul hay to the eastern states. Cooler than normal temperatures across most of the state with some areas getting some spotty rain showers. Few, reports of a 1" from some contacts along the Nebraska/Wyoming boarder. But we all know it will take several rains to make pastures lush again. Overall, crops are lagging due to the cold spring. Many producers are running water to help getting alfalfa going and to increase tonnage. Very few reports that need fall seeding alfalfa had some winter kill. No talks yet on the weevil and other harmful bugs. Per NASS, Corn planted is at 30% compared to 37% in 2020. Dry edible beans planted at 8%. Barley is 90% planted compared to 95% last year and Sugar beets comes in at 74% planted and last year was at 64%.

Prices are dollars per ton and FOB they field or hay barn unless otherwise noted.

Alfalfa Quality Guidelines

Quality	ADF	NDF	*RFV/RFQ	**TDN-100%	**TDN-90%	CP
Supreme	<27	<34	>185	>62	>55.9	>22
Premium	27-29	34-36	170-185	60.5-62	54.5-55.9	20-22
Good	29-32	36-40	150-170	58-60	52.5-54.5	18-20
Fair	32-35	40-44	130-150	56-58	50.5-52.5	16-18
Utility	>35	>44	<130	<56	<50.5	<16

*RFV calculated using the Wis/Minn formula. **TDN calculated using the Western formula. Quantitative factors are approximate, and many factors can affect feeding value. Values based on 100% dry matter (TDN showing both 100% & 90%). Guidelines are to be used with visual appearance and intent of sale (usage).

Grass Hay guidelines

Quality	Crude Protein Percent
Premium	Over 13
Good	9-13
Fair	5-9
Low	Under 5
