Direct Hay Weighted Average Report for week ending 11/19/2021

	Volume		
	This Week	Last Reported (11/1/2021)	Last Year
Tons:			
Hay	805	640	1217
Straw	100	0	0
Total	905	640	1217

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Special Note: Next available report will be in two weeks on December 2nd.

Compared to two weeks bales of alfalfa in the eastern areas steady to 10.00 higher and fully steady in the western reporting areas. Demand was moderate to good as some livestock owners are afraid, they might not have enough winter feed. Some are thinking of baling cornstalks and other low-quality feed to blend with higher protein feed for rations. Majority of the hay producers are done with 2021 alfalfa production with a few still baling the final acres of hay.

Prices are dollars per ton FOB the field or hay barn unless otherwise noted.

Alfalfa guidelines (for domestic livestock use and not more than 10% grass)

Quality	ADF	NDF	*RFV	**TDN-100%	**TDN-90%	CP
