July 29, 2020

Grain and Feedstuffs Market Trend

Compared to two weeks ago: Trade activity moderate on light demand for organic feed grade corn, trading 11 cents higher FOB. Few forward contracts. Test weights for the corn have been reported anywhere from the high 40's to the low 50's, impacting market prices. Current weighted average spot market prices for organic feed grade corn picked up at the farm are 1.06 lower than the same period last year. Trade activity light on good demand for organic feed grade soybeans. The bulk of trade activity was forward contracts for Q4 2020. Current weighted average prices for organic feed grade soybeans delivered elevator are 1.37 higher than the same period last year. Trade activity and demand light to moderate for organic feed grade wheat. Trade inactive on all other organic grains. The next available report will be Wednesday, August 12, 2020.

Current National Drought Summary (July 21, 2020)

High pressure dominated the southern half of the contiguous U.S. (CONUS) during this U.S. Drought Monitor (USDM) week. Upper-level weather systems tracked across the U.S.-Canadian border, dragging surface lows and fronts along with them. The frontal systems tapped Gulf of Mexico moisture to drop locally heavy rain across parts of the Plains to Midwest, while convective thunderstorms peppered coastal areas of the Gulf. The high-pressure ridge inhibited precipitation across much of the southern Plains to Southeast, and across most of the West. It also kept temperatures unusually hot, with daily maximums exceeding 90 degrees F across the South throughout the week and across much of the West for most of the week. The excessive heat spread into the northern Plains, Midwest, and into the Northeast as the week wore on. The persistent heat increased evapotranspiration, which dried soils and stressed crops and other vegetation. The locally heavy rains brought temporary relief from the heat and dryness, but only for those areas in the Plains and Midwest lucky enough to receive the rain.
