Livestock, Poultry, and Grain Market News

September 11, 2019

## Grain and Feedstuffs Market Trend

Compared to two week's ago: Trade activity light on light demand for organic feed grade corn and soybeans. Corn traded 12 cents lower on a light test. Cash offers continue to trend downward as new crop harvest approaches. Organic feed grade soybeans traded mostly steady. Organic feed grade wheat made the bulk of trade activity this period with cash offers unchanged. All other organic trade inactive. The next available report will be September 25, 2019.

## Current National Drought Summary (September 3, 2019)

Some rain bands from Dorian dropped 1-4 inches along Florida's east coast. Puerto Rico also missed a direct hit from Dorian as it was strengthening into a hurricane to its east, although scattered convection did bring the island some welcome rain. Elsewhere, a series of cold fronts dropped southeastward out of Canada, bringing subnormal temperatures to most of the Nation east of the Rockies, and helping to prevent Hurricane Dorian from tracking westward and making landfall in Florida. The fronts brought light to moderate rain to the northern Plains, upper Midwest, Great Lakes region, and Northeast, while clusters of storms dumped occasionally moderate to heavy (2-6 inches) rains on parts of the south-central Great Plains, lower Missouri Valley, and Southeast. The Southwest monsoon made a partial comeback, bringing light showers to portions of southern Arizona, most of New Mexico, and southwestern Texas, but overall has been a disappointment. The Far West, with high pressure in control, was mostly dry and warm. Light to moderate showers fell along southern coastal Alaska, but it was not enough for any improvement. Meanwhile, increased rainfall across southern sections of the Big Island aided vegetative growth and diminished deficits, thus improvement was shown.
