Agricultural Marketing Service  
Livestock, Poultry, and Grain Market News

October 21, 2020

## Grain and Feedstuffs Market Trend

Compared to two week's ago: Trade active on moderate demand for organic feed grade corn, trading 58 cents higher FOB. Forward contracting active mostly for Q4 2020 through Q3 2021. Trade active on good demand for organic feed grade soybeans, trading 42 cents higher FOB. Few forward contracts. Bulk of soybeans moving directly to elevators as farmers are using their bin space for corn. Limited trade activity on feed grade wheat barley and rye. Trade inactive on all other organic grains. The next available report will be Wednesday, November 4, 2020.

## Current National Drought Summary (October 13, 2020)

A dry pattern continued this past week over large portions of the continental United States, with a few exceptions being areas impacted by Hurricane Delta or its remnants, parts of the Upper Midwest and middle Missouri River Valley, and parts of the Northeast. In areas of the Northeast that received an inch or two of rain, some improvements were made in the ongoing drought areas there. As a storm system and associated cold front brought showers and thunderstorms to parts of the Middle and Upper Missouri River Valley and to the Upper Midwest, some improvements were made to ongoing drought there. Abnormal dryness abated in a few areas of Louisiana and Mississippi, which received copious rainfall from Hurricane Delta. Degradations or persistence of ongoing drought was common in parts of the Midwest, Great Plains, and West that received little or no precipitation this week. Temperatures this week were warmer than normal across most of the Lower 48. The central Great Plains and middle Missouri River Valley were the warmest compared to normal, with temperatures from 9 to 12 degrees above normal common. New England experienced milder conditions this week, with a few below-normal readings taking place in northern Vermont, New Hampshire, and Maine.
