Grain and Feedstuffs Market Trend

Compared to last period: Trade activity moderate on moderate to good demand for organic feed corn, trading 62 cents lower delivered elevator. The bulk of corn trades were forward contracts delivering Q4 2021 to Q2 2022. Organic feed soybean trade activity light to moderate on very good demand trading 40 cents higher delivered elevator. Spot market trade too limited to report for organic feed wheat, but firm undertones noted. Few forward contracts. Trade inactive on all other organic grains. The next available report will be Wednesday, October 20, 2021.

Current National Drought Summary (September 28, 2021)

Warm and dry conditions dominated much of the western half of the United States while some needed rain fell on portions of the Midwest, Mid-Atlantic, and into the Northeast. Some late summer precipitation also fell in the deserts of Arizona and New Mexico as well as along the coastal regions of the Pacific Northwest. As the 2021-22 water year came to a close, the West, northern Plains and upper Midwest had the poorest recorded precipitation while portions of the South and Southeast have recorded 110-150 % of normal precipitation during this time. Over the last week, temperatures were well below normal in the South and Southeast with some areas of Alabama and Mississippi at 4-8 degrees below normal. The warmest temperatures were in the northern Rocky Mountains and into New England where readings were 6-8 degrees above normal.
