Agricultural Marketing Service  
Livestock, Poultry, and Grain Market News

October 20, 2021

## Grain and Feedstuffs Market Trend

Compared to last period: Organic feed corn trade activity moderate on good demand, trading 40 cents higher delivered elevator. Few forward contracts for Q1 2022 delivery. Organic feed soybeans trade activity light to moderate on very good demand for spot market transactions, trading 50 cents higher delivered elevator. Trade active on very good demand for forward contracts with the bulk of contracts delivering Q4 2021 through Q1 2022. Trade active light on very good demand for organic soybean meal with no comparable trades from the prior period. Trade inactive on all other organic grains. The next available report will be Wednesday, November 3, 2021.

## Current National Drought Summary (October 12, 2021)

A long wave trough resulted in seasonal to below-normal temperatures across the western third of the contiguous U.S. (CONUS). A ridge of high pressure dominated the eastern two-thirds of the CONUS leading to above-normal temperatures, with the highest positive anomalies across the Northern Plains and Midwest. Despite the amplified ridge in the East, early in the week an upper level low pressure system drifted slowly northward from the Southeast to the Great Lakes bringing unsettled weather and keeping many areas across the Southeast and Ohio Valley wet. A coastal low pressure system along the coastal Carolinas brought some additional precipitation to coastal and inland areas of the Carolinas, leading to mixed reductions and expansion in coverage of abnormal dryness across the Carolinas and Virginia. In the Northeast, little to no precipitation fell and above-normal temperatures, coupled with long-term deficits, led to degradation and expansion of abnormally dry and severe drought areas across Upstate New York and New England. The Northern Plains and Upper Midwest experienced some of the largest positive temperature anomalies (8-10°F above normal) this week. However, a strong surface low pressure system brought heavy rainfall across the Dakotas and northern Minnesota, leading to broad 1-category improvements.
