September 22, 2021

## Grain and Feedstuffs Market Trend

Compared to last period: Organic feed corn trade activity moderate on good demand, trading 40 cents lower FOB with few forward contracts. Organic feed soybeans trade light on good demand for spot market trades and the bulk of activity on forward contracts. No comparable trades to trend. Few trades on organic feed wheat. Trade activity light on good demand. Organic soybean meal and oil too thinly traded for a trend, but firm undertones noted. Trade inactive on all other organic grains. The next available report will be Wednesday, October 6, 2021.

### Grower FOB Farm Gate Organic Grain

## Current National Drought Summary (September 14, 2021)

Open weather across much of the country favored summer crop maturation and fieldwork, including harvest efforts and winter wheat planting. Rain was observed, however, in several regions, including parts of the South and East. Portions of the Gulf Coast region had to contend with Hurricane Nicholas, the eighth Atlantic Basin tropical cyclone to make a U.S. landfall in 2021. Nicholas, briefly a Category 1 hurricane, moved ashore on Texas' Matagorda Peninsula around 12:30 am CDT on September 14, delivering heavy rain and gusty winds to the middle and upper Texas coast. Aside from the western Gulf Coast region, some of the heaviest rain (locally 4 inches or more) fell in northern New England, chipping away at lingering, long-term drought. Locally heavy showers also dotted the lower Southeast, including Florida's peninsula. Lower Southeastern rainfall was enhanced by the arrival and passage of minimal Tropical Storm Mindy, which made landfall on St. Vincent Island, Florida, at 8:15 pm CDT on September 8. Mindy's sustained winds were briefly near 45 mph, followed by weakening the following day as the remnant circulation moved northeastward across northern Florida and southeastern Georgia. Late in the drought-monitoring period, showers and thunderstorms provided some limited drought relief in the upper Great Lakes region.
