Compared to two weeks ago: Trade activity moderate on light to moderate demand for organic feed grade corn, trading 76 cents higher than the prior period. Several midwest states are reporting low test weights and high moisture. Trade activity and demand moderate on organic feed grade soybeans, trading 15 cents lower than the prior period. Bid prices for organic corn and soybeans remain mostly unchanged. Organic soybean meal continues to trade between 840.00 and 875.00 FOB the crusher. Organic soybean oil trading between 60 and 65 cents FOB the crusher. Trade inactive on all other organic grains. Due to the upcoming holiday, the next available report will be Wednesday, January 15, 2020.

### Grower FOB Farm Gate Organic Grain

#### Spot Transactions

- **Feed Grade**
  - Yellow Corn
  - Soybeans
  - Wheat
  - Oats
  - Barley
  - Rye
  - Sorghum
  - Triticale
  - Millet

#### Forward Contracts

- **Price Range**
  - N/A - N/A
  - N/A - N/A

  - N/A - N/A

#### Cash Bids

- **Price Range**
  - 9.00 - 9.00

### Dealer FOB Elevator/Warehouse Organic Grain

#### Spot Transactions

- **Feed Grade**
  - Yellow Corn
  - Soybeans
  - Wheat
  - Oats

#### Forward Contracts

- **Price Range**
  - N/A - N/A
  - N/A - N/A
  - N/A - N/A
  - N/A - N/A

### Grower FOB Farm Gate Organic Hay

#### Spot Transactions

- **Hay Type**
  - Alfalfa
  - Alfalfa
  - Alfalfa
  - Alfalfa

### USDA FAS GATS Organic Import Volume

#### Commodity

- Yellow Corn
- Soybeans
- Durum Wheat

#### Volume

- 1,695,263.80
- 1,373,038.75
- 35,044.83

#### YTD Volume

- 5,125,936.06
- 8,576,665.22
- 1,035,050.10

The U.S. Drought Monitor week saw another round of winter storms, bringing snow to the mountainous areas of the West, northern Plains, upper Midwest, and Northeast while lower elevations of the West and parts of the South, Southeast, lower Midwest, and Mid-Atlantic regions saw rain. This week’s precipitation in the Southwest left many areas with accumulations that exceeded 300 percent of normal over the past 14-day period, leading to continued improvements in short-term dryness. Once again, precipitation in the Northwest was below normal. Many locations have received less than 25 percent of normal over the last 14 days, resulting in the expansion of abnormally dry conditions. Meanwhile, another dry week in the Southern Plains and below-normal rainfall in the South and Southeast led to expansions in pockets of abnormal dryness and drought.
