Current National Drought Summary (July 6, 2021)

Another week of hot, dry weather in the Pacific Northwest, Northern Rockies, Northern Plains, and Upper Midwest led to the expansion of drought conditions. Meanwhile, monsoon thunderstorms brought wet weather to eastern New Mexico and West Texas resulted in large one-category improvements. Showers and thunderstorms associated with a slowly moving cold front helped improve conditions in the Great Lakes region and eastern U.S. Drought expanded in parts of the Mid-Atlantic that missed out on the heaviest rain.
