For information call David M. Mueller at (202) 720-3843. Office hours are 8:00 a.m. to 4:30 p.m. ET.

CELERY: The season has ended in New York. In Florida, transplanting schedules were interrupted in both the Everglades and Central area by frequent rains. Earlier planted fields are in mostly good condition. Michigan crop development had been slowed by season-long low temperatures. Quality remained good in spite of recent light frost. Harvest should continue through the third week of October. California's Central Coast celery harvest was moderate with good quality reported.

The next "Celery" report will be released at 1:00 p.m. ET on November 6, 1992.
