Turkeys Tested

More turkeys were tested during August for pullorum disease than in August 1957. The number of heavy white breeds tested totaled 48,640--the number of other heavy breeds tested totaled 92,548, up 6 percent and 35 percent respectively from August 1957. The number of light breed turkeys tested totaled 71,483--up 227 percent from August last year.

During the months July through August of this year, the testings of heavy breed turkeys were 37 percent larger than during the same months in 1957. Heavy white breeds tested were up 53 percent and other heavy breeds tested were up 24 percent. The testings of light breeds were 173 percent more than during July through August last year.

Chickens Tested

In the States for which comparisons are available, 1,596,792 chickens for supplying broiler hatching eggs were tested during August--about the same as in August 1957. Testings July through August totaled 3,224,921--up 11 percent from the testings during the same period in 1957. The number of chickens for other purposes tested during August totaled 599,607--11 percent less than in August 1957. The number tested July through August of this year totaled 1,100,165--up 6 percent from the same months in 1957.

This report is made possible through the cooperation of the National Poultry Improvement Plan and National Turkey Improvement Plan official State agencies, the Animal Husbandry Research Division, Agricultural Research Service, and the Agricultural Estimates Division, Agricultural Marketing Service.
