**Farms and Land in Farms:** Final Estimates by State and United States, 1993-97, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service (NASS), Statistical Bulletin No. 955.

**Introduction:** Number of farms and land in farms estimates are published annually. These data were collected by the National Agricultural Statistics Service during the June Agricultural Survey and the Fall Agricultural Survey using sampling procedures to ensure every farm operator had a chance of being selected. In addition, the responsibility for the Census of Agriculture was transferred to NASS from the Census Bureau starting with the 1997 Agricultural Census.

The farm definition for the Census of Agriculture and the Department of Agriculture's (USDA) NASS official estimates of farms are now the same. That is, a **farm** is any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year. Over the last five years, there have been some substantial changes in the farm definition so that the Census of Agriculture and NASS official series would have the same definition. In addition, new industries were added to both counts because of the implementation of the new North American Industry Classification System (NAICS).

The following changes were made to ensure comparability between the Census of Agriculture data and the annually published NASS estimates. Beginning in 1995, NASS survey interviewers counted operations having five or more horses or ponies and no other agricultural sales as farms. An operation with one or more horses with agricultural sales of at least \$1,000 already qualified as a farm on both the NASS survey and the Census. Beginning in 1997, the NASS Fall Agricultural Survey was added to estimate all operations qualifying as a farm during the year, the census reference period. Beginning with the 1997 Census of Agriculture, Christmas tree farms and farms that were wholly enrolled in the Conservation Reserve Program were included in the census farm count to coincide with the NASS official estimates. Two new industries, Maple Syrup and Short Rotation Woody Crop farms, were added to both counts beginning in 1997 as a result of NAICS.

All the changes in the farm definition occurring over the last five years were carried back to 1993 and included in the 1993-97 estimates. This "level" change ensured comparability not only between the Census of Agriculture data and the annually published NASS estimates, but also between years within this publication. This publication provides five years of consistent estimates. Because of these changes in the farm definition, the official estimates show a sizeable difference in the number of farms between 1992 and 1993 in some States.

**Land in farms** is all land operated by farms during the year. It includes crop and livestock acreage, wasteland, woodland, pasture, land in summer fallow, idle cropland, and land enrolled in the Conservation Reserve Program and other set aside or commodity acreage programs. It excludes public, industrial, and grazing association land and nonagricultural land. It excludes all land operated by establishments not qualifying as farms. The reevaluation of the use of public lands in the West caused some significant changes in land in farms estimates in some States. Public land used as a common grazing area is not considered land in farms while public land leased solely by a farm or ranch operator is. There was also some re-determination of the amount of Indian reservation land that was included in land in farms.

**Economic sales classes** are based on the gross value of sales, which include sales of agricultural products such as crops, livestock, horses, honey, furs, fish, nursery and greenhouse products, rabbits, etc. Governments program payments are also included.

**Procedures:** Revisions were made after a thorough review of the original survey data and the 1997 Census of Agriculture and account for the definitional changes described in the introduction. The 1993 - 1997 estimates shown here are considered final and will not be revised again.

At the National level, revisions to estimates of number of farms in the United States ranged from an increase of 5.7% to 6.4%. The revisions to estimates of land in farms in the United States ranged from a decrease of 0.8% to a decrease of 1.3%.

**Historic Estimates:** Final estimates of Farms and Land in Farms in earlier years are available in Statistical Bulletins No. 895 for 1988-92, No. 792 for 1979-87, SpSy3 for 1975-80, No. 594 for 1969-75, No. 507 for 1959-70, No. 316 for number of farms estimates for 1910-59 and land in farms estimates for 1950-59.

**Other Statistical Bulletins:** The National Agricultural Statistics Service will issue a series of twenty bulletins in 1998-99 containing final estimates for agricultural commodities based on the review of the 1997 Census of Agriculture and other information. The product number, bulletin title, and tentative release dates are as follows.

**Electronic Publications:** These bulletins will be available **FREE OF CHARGE** on the Internet from the NASS Home Page at: <http://www.usda.gov/nass/>, in either text or PDF format. From the Homepage select "Historic Data," then "Statistical Bulletins."

**Internet Published Estimates Database:** Selected historical State and U.S. information is now available in an online database via the Internet **free of charge**. County information will be available by mid 1999. The database allows custom extracts based on commodity, year, state and other selection criteria and produces an output file compatible for updating databases and spreadsheets. The database can be accessed from the NASS Home Page at: <http://www.usda.gov/nass/>.

**Printed Copies:** Printed copies of the bulletins may be ordered by calling the Sales Order Desk toll free at 1-800-999-6779. Costs for printed copies of the publications range from \$15.00 to \$20.00. Visa, MasterCard, check, or money order are acceptable for payment.

**Agricultural Census Publications:** The Volume 1, Geographic Area Series publication containing the United States Summary provides National data and selected data for each State. Separate State reports present statistics for the entire State and each county. Census reports cover the 1997 production year, with comparative data for earlier census years. The 1997 Census of Agriculture Geographic Area Series products, including all manipulable data files and Adobe Acrobat (PDF) files of the printed reports, will be available on March 20, 1999 via the Internet at: <http://www.usda.gov/nass/>. The information is also available on CD-ROM, and in printed publications. Printed copies of the Census publications and CD-ROM's may be ordered by calling the Sales Order Desk toll free at 1-800-999-6779.

**Assistance:** For more information pertaining to this bulletin, call the Livestock and Economics Branch at (202) 720-3570. For assistance with general agricultural statistics or further information about NASS or its products and services, contact the **Agricultural Statistics Hotline** at **1-800-727-9540**, 7:30 a.m. to 4:00 p.m. ET, or e-mail: [nass@nass.usda.gov](mailto:nass@nass.usda.gov).
