This is the ninth annual bulletin summarizing the latest available monthly, season, and annual price estimates shown currently in Agricultural Prices and in the various annual publications showing Production, Use, and Value.

Prices Received by Farmers

The series designated Prices Received by Farmers relates to the average prices farmers receive for their products - generally at the point of first sale. Points of first sale by farmers may range from sales on a graded, packed, and delivered basis to bulk sales at the farm. The average price concept is that of a price which would result from dividing the total sum received by all farmers for that commodity by the total quantity of the commodity sold. These estimates, except as noted below, do not measure the price of specified grades, kinds, or varieties at a common point of sale.

Milk sold wholesale, apples, and citrus fruit are exceptions to the "as sold" basis. Milk is priced f.o.b. plant or receiving station except in California where it is priced f.o.b. ranch. The apple price series relates to the equivalent packinghouse-door returns for Washington and Oregon, to equivalent returns for bulk fruit at first delivery point for California, and to the price at point of first sale for other States. Citrus prices relate to equivalent returns at a specific point of sale. The citrus series is omitted from this publication, inasmuch as revised monthly equivalent returns for the 1966-1967 crop will be published as a supplement to the September 1968 issue of Agricultural Prices.

Monthly and season or annual average U. S. prices do not include Alaska and Hawaii prior to 1962. Beginning with 1962, prices for Alaska and/or Hawaii are included for hogs, beef cattle, calves, sheep, all chickens, chickens excluding broilers, broilers, eggs, wool, all milk wholesale, and fluid market milk. Tables presenting prices for these commodities indicate the basis on which data are reported; i.e., monthly and annual average or annual average only.

Monthly Prices. Prices for most commodities are collected during a 5-day period centered on the 15th of the month. These prices are used to represent average prices received for sales of the commodity during the month. For some commodities, monthly prices as published currently are reviewed at the end of the season and revised, if necessary, to take into account sales for the entire month. Notable among this group are meat animals and milkfat in cream. For the following commodities the current estimate is defined as a monthly average: apples, peaches, pears, strawberries, citrus, potatoes, tobacco, milk sold at wholesale to plants and dealers, broilers, and wool. At the State level, prices are generally estimated only for months in which there are 0.5 percent or more of annual sales of the commodity.

Weights for computing monthly regional and United States average prices are as follows: (a) Annual production or sales for hay, all meat animals except beef cattle, milkfat in cream, milk retailed by farmers, and wool. At the end of the marketing year regional and United States wool prices are recomputed, using estimated sales during the month; (b) January 1 inventory numbers for milk cows; (c) Estimated marketings during the month for all other commodities.

State season average prices are computed by weighting mid-month prices by the estimated percentage of sales made each month in the marketing season. Also included in the season average price are allowances for unredeemed loans and purchases by the Government, if any, valued at the average loan and purchase rate, by States. United States season average prices are computed by weighting State season average prices by the estimated quantities sold in each State. Marketing seasons for each commodity are shown on pages 178 and 179.

State annual average prices are computed by weighting monthly prices by the estimated proportion of the calendar year sales made each month. Regional and United States average prices are obtained by weighting State prices by estimated quantities sold in each State.

Prices Paid by Farmers

The State, regional, and U. S. averages of prices paid by farmers for goods and services presented in this summary are based primarily on the voluntary reports of thousands of merchants and dealers throughout the Nation. These estimates of average prices, together with computed indexes and price ratios as published here, relate to transactions as of the 15th of the month designated. The price data underlying the estimates are collected from dealers and merchants at regularly recurring intervals by means of mailed inquiries and personal enumeration.

Average prices are collected for the most important commodities purchased by farmers. Reporters are asked to quote the price of the most commonly sold item that best fits the questionnaire definition or specification. These specifications vary in preciseness according to the importance of the specifications in determining price, in which case specifications are more descriptive. Lumber prices, for example, vary to some extent with length of cut and the species and grade of lumber. Similarly, prices are requested for dairy feed with a definite protein content, and for tractors of specific types in specified horsepower categories. Commodities for which minor variations in specifications or description are not critical factors in price determination are specified in general terms. In all cases dealers are asked to report the price of the size, grade, or quality of the item, as described in the question, most commonly sold to farmers.

For some supermarket items, where the contents of packages often vary considerably, respondents are asked to report both price and size of package most commonly sold. Prices reported for varying container or package sizes are then converted to an equivalent per-pound basis.

The average prices published in the following tables are a combined weighted average of chain and independent store prices for food and tobacco, household supplies, clothing and dry goods, household furnishings, building and fencing materials, motor supplies, and farm supplies. Prices paid for farm machinery, field seed, livestock and poultry feed, fertilizer, baby chicks, and turkey poults are based on quotations from independent store operators only. Regional and U. S. prices where shown are weighted averages.

Copies of this annual price summary are available upon request to the United States Department of Agriculture, Statistical Reporting Service, Washington, D. C. 20250. Prices paid for feed, seed, fertilizer, and certain other items also are published currently, by States, in monthly issues of AGRICULTURAL PRICES, a report of the Statistical Reporting Service of the United States Department of Agriculture, Washington, D. C.

1/ Average per unit production payments made on milkfat in cream, milk, beef cattle, sheep, and lambs are included for period October 1943-June 1946 inclusive.

Indexes of Prices Received by Farmers, and Index of Prices Paid
by Farmers, including Interest, Taxes, and Farm Wage Rates

The standard reference base for the major statistical series of the Federal Government is updated approximately every 10 years. Budget Bureau Circular A-28, dated May 10, 1960, changed this base from 1947-49 to 1957-59, effective January 1962.

These converted data supplement, but do not replace, the official series which, pursuant to law, are published on the 1910-14=100 base.

1/ Refers to crop of designated year. Preliminary season average price estimates for the 1967 crop based on sales through November with an allowance for marketings for the remainder of the season. A report covering farm disposition, season average price and value for the 1967 crop will be issued August 8, 1968.

2/ Discontinued.

POTATOES: Monthly and season average price per cwt. received by farmers, by States and United States, 1966

1/ The season average price refers to crop of designated year. The monthly prices refer to all potatoes being sold in a given month regardless of the year harvested. Thus the U. S. all-potato price for April 1966 includes sales from the 1965 fall crop and the 1966 winter and 1966 spring crops.

2/ Monthly price estimates discontinued at the beginning of the 1966 crop year; only season average prices will be published in the future.

POTATOES: Monthly and season average price per hundredweight received by farmers, by States, 1967; United States, 1962-67 1/-continued

1/ The monthly price refers to all potatoes being sold in a given month regardless of the year harvested.
2/ Refers to crop of designated year. Preliminary season average price estimates for the 1967 crop based on sales through November with an allowance for marketings for the remainder of the season. A report covering farm disposition, season average price and value for the 1967 crop will be issued August 8, 1968.

APPLES, COMMERCIAL CROP FOR FRESH CONSUMPTION: Monthly and season average price 1/ per pound received by farmers, by States, 1967; United States, 1962-67

1/ Average local market price for wool sold; does not include incentive payment. Regional and U. S. price computed by weighting State prices by estimated sales of shorn wool. 2/ Monthly prices not shown to avoid disclosure of sales by individual producers. 3/ U. S. prices include Alaska monthly prices and Hawaii not shown separately. 48-State average and U. S. monthly and annual prices are identical. 4/ April-December 1963 marketing year.
