

STOCKS of SOYBEANS in All Positions

Release:
September 24, 1969
3:00 P.M. EDT

Carryover of old crop soybeans in all positions on September 1, 1969 totaled 321.9 million bushels, according to the Crop Reporting Board. This is sharply above the 166.3 million bushels on hand a year earlier and the 90.1 million bushels on hand September 1, 1967.

Off-farm stocks at 252.4 million bushels were more than double a year earlier. Farm stocks at 69.5 million bushels were 15 percent above September 1, 1968. Of the total September 1, 1969 soybean stocks, there were 126 million bushels owned by Commodity Credit Corporation stored in warehouses and bin sites and Commodity Credit Corporation loans were outstanding on 165 million bushels more.

The September 1 end-of-crop-year stocks indicate a disappearance of 924 million bushels from a supply of 1,246 million bushels (carryover of 166 million bushels plus 1968 production of 1,080 million bushels). During this period approximately 602 million bushels were processed for oil, 287 million bushels were exported, and 50 million bushels were used for seed and feed.
