Catfish Feed Deliveries

Released August 21, 2006, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on *Catfish Feed Deliveries* call Charles Butler at 601-965-4575, office hours 8:00 a.m. to 4:30 p.m. CT.

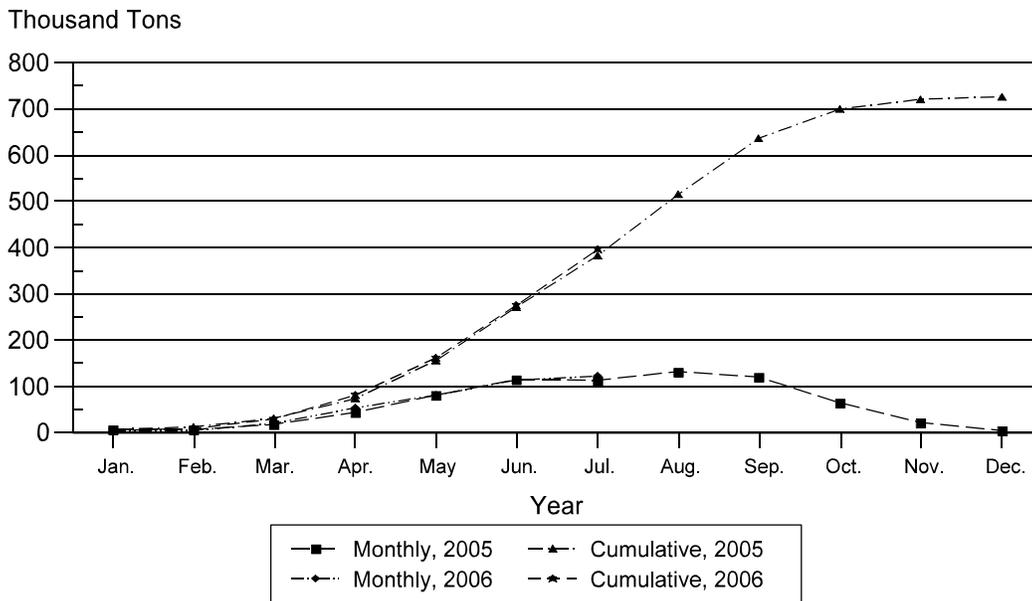

July 2006 Catfish Feed Deliveries Up 10 Percent From Last Year

Total catfish feed delivered in the United States during July 2006 was 131,281 tons, up 10 percent from July 2005 and 11 percent above the previous month. Feed delivered for foodsize fish totaled 121,527 tons, and feed for fingerlings and broodfish totaled 9,754 tons in July 2006.

July feed delivered to Mississippi catfish growers for foodsize fish totaled 60,023 tons, up 9 percent from last year and accounted for 49 percent of the total foodsize catfish feed delivered to U.S. farmers.

The other major States with catfish feed deliveries for foodsize fish in July were: Alabama with 31,555 tons, Arkansas with 20,357 tons, and Louisiana with 3,652 tons.

Catfish Feed Deliveries

Survey Procedures: Survey data for catfish feed are collected from feed mills by the USDA-NASS Mississippi Field Office, who is responsible for ensuring survey coverage is as complete as possible. Mills are contacted by mail, telephone, fax, or internet.

Estimation Procedures: The "**Catfish Feed Deliveries**" report refers strictly to catfish feed *delivered* to bonafide catfish producers and excludes catfish feed delivered to producers of other species. The totals include both bagged and bulk feed. Prior to summarization, questionnaires are compared to previous reports for comparability. Estimates are made for feed mills whose reports are not available in time to be included in the release. Those plants are identified by an asterisk on page 10 of this release. Estimates are based on the mill's previous reports and current conditions. Published totals are a straight summation of the individual reports and estimated data.

If a mill uses a fiscal accounting system, proration is used to convert reported data to a calendar month basis.

Two unusual features of this report are worthy of note: (1) cooperating feed mills are listed by name, and (2) it is impossible for the public to infer the amount of catfish feed *produced* in each state. Since many mills *deliver* feed to more than one state and to growers of other species, any inferences about overall production per state or per mill are not valid.

Reliability: Catfish Feed Deliveries estimates are based on a census of all known active and cooperating catfish feed mills, and therefore have no sampling variability. However, estimates may be subject to errors such as omissions, duplication, and mistakes in reporting, recording, and processing of the data. These errors are minimized through strict quality controls in the edit and summarization process, and a careful review of all reported data for consistency and reasonableness.

Revision Policy: Revisions may be necessary in the following month's publication pending a review of late reports received from mills. Revisions to previous estimates are made to improve month to month relationships. Estimates for the previous month are subject to revision in all States each month when current estimates are made. In February, all monthly estimates for the previous year are reviewed and subject to revisions. The review is primarily based on data that may have been received after the original estimates were published.

Definitions Used for Catfish Feed Sales

Broodfish - Fish kept for egg production, including males.

Catfish Feed - For the purposes of this report catfish feed is defined as feed *delivered* to bonafide catfish producers. Thus, it is not the absolute total amount of feed produced or even sold by a mill. (Some catfish feed is sold to producers of other species of fish.) The definition includes medicated feed.

Catfish Feed for Foodsize Fish - Feed containing pellets larger than 1/8 of an inch.

Catfish Feed for Fingerlings/Broodfish - Feed containing pellets 1/8 of an inch or smaller.

Fingerlings - Smaller fish about 2 to 6 inches in length.

Foodsize Fish - Fish being grown commercially for human consumption. Optimum sizes at harvest depend on the market but are generally no lower than 3/4 pound but near one pound.

Data were compiled in cooperation with the following feed mills:

Alabama Feed Mill LLC
Arkat Feeds
Cargill Animal Nutrition
Carolina Fish Feeds
Delta Western
Fishbelt Feeds Inc
Flint River Mills Inc

*Land O Lakes
Rangen Inc.
Silver Cup
Southfresh Feeds
Star Milling Co.
Topwater Feed Mill
