MARKETING SEASONS FOR SPECIFIED CROPS

Apples: All South Atlantic States, Kentucky, Tennessee, Indiana, Illinois, Missouri, Arkansas, New Mexico, and California, June 1 to May 31; all other States, July 1 to June 30, except Washington and Oregon where the bulk of the crop is marketed August 1 - July 31.

Avocados: California--October 1 to September 30.
Florida--July 15 to March 1.

Cranberries: September 5 to April 1.

Dates: August 15 to March 15.

Olives: September 25 to March 15.

FRUITS - NONCITRUS

By States, 1967 and 1968

Production, Use, and Value

Part II

This report, (Part II), presents statistics on production, farm disposition, price, value, and utilization of sales for 5 noncitrus fruits--apples, avocados, cranberries, dates, and olives--as well as summary tables for 16 specified noncitrus fruits. Part I, published in May 1969, contained statistics for apricots, cherries, figs, grapes, nectarines, peaches, pears, persimmons, plums, pomegranates, and prunes. Bush berry estimates, limited to Washington and Oregon, were also published in Part I.

The production, price, and value estimates for 1968 crops have been revised, where necessary, from the preliminary estimates published in the Annual Crop Summary and in Crop Values on December 19, 1968. Such revisions are based upon more complete check data available at the end of the marketing season from: marketing agreement records, recorded rail and truck movement, inspection records, quantities used by commercial processors, and quantities held in cold storage or controlled atmosphere storage.

Production includes fruit harvested plus quantities of mature fruit not harvested. Production having value includes quantities sold and quantities used in the farm household, but excludes quantities not harvested and excess cullage of harvested fruit. Statistics on utilization of fruit by commercial processors refer to first utilization, not necessarily the final utilization. For example, frozen fruit which may later be used for jellies, sauces, etc., is included as frozen fruit.

The prices used for computing value in this publication are not comparable in all cases with those used for 1962 and earlier years. Processing prices are the equivalent returns for fruit delivered to the processing plant door. Prior to 1963 processing prices were returns at first delivery point in California and the returns at the point of first sale in other States, which in many cases was the packinghouse door.

Season average prices for fruit for fresh use are usually the average returns at the point of first sale. Exceptions as shown in footnotes to the table are: In Washington and Oregon, for certain crops, fresh fruit prices are the equivalent returns at the packinghouse door and in California, the price of fruit for fresh use is based on the first delivery point.

The season average price is applied to "production having value" to compute value of production. The average price shown for the United States is obtained by dividing the United States value of sales by the United States quantity sold.

The value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts from these crops for a calendar year.

A similar report on tree nuts will be issued August 1, 1969; a report on citrus fruits will be published October 2, 1969.

Table 1.--Production of noncitrus fruits, by kinds, United States, 1967 and 1968
(In thousands of tons - fresh equivalent)

Season	Apples (commercial crop 1/)	Apricots	Avocados	Cherries	Cranberries	Dates	Figs
1967	2,713	148	52	199	70	21	42
1968	2,727	149	72	229	73	23	50

Season	Grapes	Nectarines	Olives	Peaches	Pears	Persimmons and pomegranates	Plums and prunes	Total fruits
1967	3,069	55	14	1,345	463	3	583	8,777
1968	3,549	64	86	1,830	623	5	532	10,012

1/ Estimates of commercial crop refer to the total production of apples in the commercial orchards of 100 or more bearing age trees.

Table 2.--Production, value, and utilization of 16 noncitrus fruits 1/, United States, 1967 and 1968

Season	Production 2/		Farm disposition		Value of --	
	Total	Having value	Home use	Sold	Production	Sales
	1,000 <u>tons</u>	1,000 <u>tons</u>	1,000 <u>tons</u>	1,000 <u>tons</u>	1,000 <u>dollars</u>	1,000 <u>dollars</u>
1967	8,777	8,656	47	8,609	979,424	972,177
1968	10,012	9,868	48	9,820	1,116,912	1,109,889

Season	Utilization of sales					
	Fresh sales	Processed				
	Total	Canned	Dried	Frozen	Other 3/	
	1,000 <u>tons</u>	1,000 <u>tons</u>	1,000 <u>tons</u>	1,000 <u>tons</u>	1,000 <u>tons</u>	1,000 <u>tons</u>
1967	2,989	5,620	1,821	1,344	247	2,208
1968	3,328	6,492	2,297	1,693	266	2,236

1/ Apples (commercial crop), apricots, avocados, cherries, cranberries, dates, figs, grapes, nectarines, olives, peaches, pears, persimmons, plums, pomegranates, and prunes. 2/ Differences between total production and production having value are quantities of mature fruit not harvested and excess cullage of harvested fruit. 3/ Used for jellies, juices, wines, etc.

Table 3.--BANANAS AND PAPAYAS, HAWAII: Production, farm disposition, season average price, value, and utilization, 1967 and 1968

Crop and season	Production 1/		Farm disposition		Price per pound 2/	Value of production 3/	Utilization of sales	
	Total	Having value	Home use	Sold			Fresh sales	Processed
	1,000 <u>pounds</u>	1,000 <u>pounds</u>	1,000 <u>pounds</u>	1,000 <u>pounds</u>	Cents	1,000 <u>dollars</u>	1,000 <u>pounds</u>	1,000 <u>pounds</u>
Bananas:								
1967	8,095	8,095	---	8,095	7.0	567	7,734	361
1968	6,485	6,485	---	6,485	7.7	499	6,485	---
Papayas:								
1967	22,845	22,845	---	22,845	7.4	1,691	19,393	3,452
1968	23,550	23,550	---	23,550	9.6	2,260	20,085	3,465

1/ Production all utilized.

2/ Price is derived by dividing value of sales by quantity sold.

3/ Value of production and value of sales are the same.

Table 4.--APPLES, commercial crop 1/: Production, farm disposition, season average price, and value, by States, 1967

State and area	Production 2/		Farm disposition		Price per pound 3/	Value of --		
	Total	Having value	Home use	Sold		Production	Sales	
	1,000 bushels	Million pounds	Million pounds	Million pounds	Cents	1,000 dollars	1,000 dollars

United States	119,672	5,425.1	5,394.9	33.3	5,361.6	5.56	299,769	297,928

1/ Estimates of commercial crop refer to the total production of apples in the commercial orchards of 100 or more bearing age trees.

2/ Differences between total production and production having value are quantities of mature fruit not harvested and excess cullage of harvested fruit as shown on page 16.

3/ Fresh fruit prices are equivalent returns at packinghouse door for Washington and Oregon and at first delivery point for California. For other States, returns at point of first sale. Processing prices are equivalent returns at processing plant door.

4/ Less than .05 million pounds.

1/ Estimates of commercial crop refer to the total production of apples in commercial orchards of 100 or more bearing age trees. 2/ Mostly crushed for vinegar, cider, and juice. For some States, some quantities canned, dried, or frozen are included to avoid disclosure of individual operations. 3/ Included in "Other processed" to avoid disclosure of individual operations.

4/ New Jersey, Delaware, Maryland, North Carolina, and South Carolina. 5/ Ohio, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Kentucky, Tennessee, and Arkansas.

6/ Idaho, Colorado, New Mexico, and Utah.
