For Week 29, whole milk powder (WMP) prices dropped on both ends of the range. Price drops are reflective of the region moving into the high production season. However, contacts indicate some uncovered demand in Brazil for the balance of the year. Import numbers of WMP are down in Chile and Brazil year-over-year through June 2025. Production of WMP appears to be slower.

Prices for: South America, All First Sales, F.O.B. - Port, Conventional, and Edible Whole Milk Powder

Price Range - 26% Butterfat; \$/MT:	3,900 - 4,600
