

# Oilseeds: World Markets and Trade

## U.S. Soybean Oil Premiums Evaporate on Lower Demand

**Soybean Oil Price Differential  
U.S. Gulf - South America Port**

U.S. soybean oil prices at the Gulf peaked at nearly \$500/ton above South American port quotes in mid-June but fell precipitously in July and August. However, premiums have risen again in recent weeks and currently stand near \$90/ton. While this is well above the previous 4-year average of \$12/ton, it does put the premium near levels observed in March.

Much of the rise in U.S. soybean oil Gulf prices relative to those in South America was rooted in expected dramatic growth in demand from planned renewable diesel plants. U.S. supplies were already tight and required demand rationing via higher prices to get expected demand in line with anticipated supply. At nearly \$500/ton, the premium for U.S. soybean oil was unsustainable and had the desired effect of reducing export and biofuel demand. Though premiums have declined substantially, prices at the Gulf remain elevated near \$1,450/ton. This is roughly \$400/ton above the level seen at the beginning of the year and nearly double the 4-year average Gulf price observed between 2017 and 2020.

Reductions in global sunflowerseed and palm oil production last year contributed to higher prices in all oils in late 2020. In 2021, rising energy prices, demand for biofuels, growing global food oil demand, and lower rapeseed supplies in Canada have all combined to push vegetable oil prices higher. For the U.S. domestic market, the reduced supplies and higher prices for Canadian rapeseed oil will likely continue to support current soybean oil prices and premiums over South American-sourced oil in the coming year.

USDA currently forecasts soybean oil export volume in 2021/22 at roughly half the level observed in 2019/20 when U.S. soybean oil was selling at a discount to South American origin. In the first few months of 2021, soybean oil export volume declined on rising premiums. As a result, U.S. exports during the June-August period were down 70 percent from a year earlier. U.S. soybean oil imports also rose in line with the increasing premiums, with August import volume exceeding exports for the first time in many years.

If recent history is a guide, current premiums would translate into minimal declines in exports to Canada and Mexico due to logistical efficiencies and well-developed supplier relationships. Other nearby markets could be down 50 percent with remaining markets down 70 percent.

## MARKET FEATURE

### U.S. Soybean Exports to Turkey Set to Grow in 2021/22 on Newly Approved Biotech Events

*Source: U.S. Census Bureau Trade Data and U.S. Export Sales Report (week ending September 30, 2021)*

Between 2015/16 and 2017/18, the United States accounted for nearly 15 percent of Turkey soybean imports. However, between 2018 and 2020, no new biotech soybean events were approved by Turkey, leading to a drastic and sustained dip in imports of U.S. soybeans. As a result, the United States only accounted for about 1 percent of Turkey soybean imports over the following 3 marketing years.

Conversely, U.S. soybeans are well-positioned for growth to Turkey in 2021/22. According to U.S. Export Sales data through September 30, 2021, outstanding sales of U.S. soybeans to Turkey in 2021/22 were 170,000 tons, almost double total exports during the previous 3 marketing years combined. This spike in sales is a direct result of the Turkish government's approval of six new soybean biotech events in early 2021, likely an effort to help relieve high feed costs for the domestic poultry industry. In addition to the meteoric rise in global soybean and corn prices throughout late 2020 and early 2021, the value of the Turkish lira has dropped to record lows. Over the past 5 years, the lira has lost about two-thirds of its value versus the U.S. dollar and 40 percent versus the Brazilian real. The weak lira makes feed even more costly for the Turkish poultry industry as feed accounts for about 80 percent of total expenditures and the sector is reliant on imports of feedstuffs to meet demand. With climbing costs and growing domestic and export demand for poultry, Turkey soybean importers will likely turn to the 2021/22 U.S. soybean harvest as it begins to be marketed this month. Typically, the U.S. crop is priced more competitively than South American soybeans until that crop is harvested and marketed early the following year.

## **PROJECTION FOR 2021/22**

Global 2021/22 oilseed production is slightly down this month on smaller Argentina soybean, Black Sea sunflowerseed, and Canada rapeseed crops more than offsetting higher U.S. soybean and Pakistan cottonseed crops. Likewise, global crush is down driven mostly by those three smaller crops. Trade is up marginally on higher Canada and Ukraine rapeseed exports to China, the United Arab Emirates, and the European Union. Global ending stocks are up nearly 5 percent on higher U.S., Argentina, and China soybean and EU rapeseed stocks more than offsetting lower Argentina and Ukraine sunflowerseed stocks.

Global production of protein meal is forecast down on lower crush. Protein meal trade is slightly lower on smaller Canada rapeseed meal exports to China and the United States. Protein meal consumption is little changed overall, while stocks are up on higher Argentina and Brazil soybean meal stockpiles. Global vegetable oil production is slightly down on lower crush. Vegetable oil trade is down fractionally due to smaller Canada rapeseed oil exports to China. Consumption is slightly down on lower rapeseed and palm oil food use and soybean oil industrial use. Stocks are marginally up on gains in palm oil and palm kernel oil partially offset by smaller rapeseed oil stocks. The projected U.S. season-average farm price for soybeans is down 55 cents to \$12.35 per bushel.

## **PROJECTION FOR 2020/21**

Global 2020/21 oilseed production is slightly up this month as a larger U.S. soybean crop is partially offset by a lower China sunflowerseed crop. Global oilseed trade is down mostly due to lower Brazil and Uruguay soybean exports and lower Egypt and Turkey soybean and China rapeseed imports. Oilseed crush is down on lower China and Argentina soybean and China sunflowerseed crush. Global oilseed stocks are up over 3 percent as lower Argentina and China soybean crush volumes and the larger U.S. crop flow into stocks and more than offset smaller sunflowerseed and peanut stocks in Argentina.

Global protein meal production is down slightly on lower Argentina and China crush. Protein meal exports are marginally down on lower Brazil soybean meal exports. Global consumption is little changed overall. Global protein meal stocks are up almost 9 percent mostly on higher South America soybean meal stocks. Global vegetable oil production is down marginally on lower crush. Global vegetable oil trade is little changed overall as higher India palm oil imports mostly offset lower Black Sea sunflowerseed oil exports. Vegetable oil consumption is little changed overall, while stocks are up on higher Black Sea sunflowerseed oil stocks due to slowing exports. The projected U.S. season-average farm price for soybeans is down 10 cents to \$10.80 per bushel.

## EXPORT PRICES

### September 2021 Soybean Export Prices

	U.S.	Argentina	Brazil
<b>September Avg Price</b>	<b>\$534/ton</b>	<b>\$545/ton</b>	<b>\$554/ton</b>
<b>Change vs August</b>	<b>- \$9/ton</b>	<b>+ \$10/ton</b>	<b>+ \$4/ton</b>

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

September export prices for U.S. soybeans declined 2 percent on the slower pace of export sales and rising supplies. This contrasts with South America where prices strengthened as supplies declined from harvest. Early October price trends show further declines for U.S. soybeans following supply gains from the September 30 stock report. Similar declines were noted in Brazil on slowing China demand while prices in Argentina are holding firm on recent sales to China.

### September 2021 Soybean Meal Export Prices

	U.S.	Argentina	Brazil
<b>September Avg Price</b>	<b>\$418/ton</b>	<b>\$402/ton</b>	<b>\$415/ton</b>
<b>Change vs August</b>	<b>- \$4/ton</b>	<b>+ \$9/ton</b>	<b>- \$2/ton</b>

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

Prices for U.S. and Brazil soybean meal in September were down slightly from August reflecting the downward trend in soybean prices. Argentina prices rose on stronger demand with buyers shifting purchases early in the month to Argentina away from U.S. Gulf Coast export facilities hampered by Hurricane Ida.

## September 2021 Soybean and Palm Oil Export Prices

	U.S. Soybean Oil	Argentina Soybean Oil	Brazil Soybean Oil	Indonesia Palm Oil	Malaysia Palm Oil
<b>September Avg Price</b>	<b>\$1,384/ton</b>	<b>\$1,307/ton</b>	<b>\$1,313/ton</b>	<b>\$1,213/ton</b>	<b>\$1,180/ton</b>
<b>Change vs August</b>	<b>- \$95/ton</b>	<b>+ \$5/ton</b>	<b>- \$11/ton</b>	<b>+ \$29/ton</b>	<b>+ \$28/ton</b>

Source: International Grains Council; all prices are FOB: U.S. Gulf, Argentina Up River, Brazil Paranagua

U.S. soybean oil prices fell in September on weaker-than-anticipated demand from the biofuel industry. Brazil soybean oil prices are down slightly on higher supplies, while Argentina prices rose marginally on stronger export demand. Palm oil prices rose on increased demand from India and China as global export supplies remain tight. Malaysia exports continues to be hampered by labor shortages and Indonesia by export taxes.

**2021/22 OUTLOOK CHANGES** (All figures are in thousand metric tons)

Country	Commodity	Attribute	Previous	Current	Change	Reason
<b>Argentina</b>	Meal, Soybean	Exports	29,500	<b>29,300</b>	<b>-200</b>	Expected lower crush
<b>Canada</b>	Meal, Rapeseed	Exports	4,500	<b>3,950</b>	<b>-550</b>	Lower rapeseed production and crush
	Oil, Rapeseed	Exports	3,200	<b>2,700</b>	<b>-500</b>	
	Oilseed, Rapeseed	Exports	5,800	<b>6,300</b>	<b>500</b>	Increased exportable supplies on lower crush
<b>China</b>	Meal, Rapeseed	Imports	1,535	<b>1,280</b>	<b>-255</b>	Lower Canada crush
	Oil, Rapeseed	Imports	1,900	<b>1,600</b>	<b>-300</b>	Lower Canada crush
	Oilseed, Rapeseed	Imports	1,850	<b>2,200</b>	<b>350</b>	Higher Canada exports
<b>Philippines</b>	Meal, Soybean	Imports	2,600	<b>2,800</b>	<b>200</b>	Revised data source
<b>Russia</b>	Oilseed, Sunflowerseed	Exports	950	<b>800</b>	<b>-150</b>	Lower production
<b>Ukraine</b>	Oilseed, Rapeseed	Exports	2,550	<b>2,700</b>	<b>150</b>	Higher production
<b>United Arab Emirates</b>	Oilseed, Rapeseed	Imports	825	<b>1,050</b>	<b>225</b>	Higher Canada exports
<b>United States</b>	Meal, Rapeseed	Imports	3,370	<b>3,070</b>	<b>-300</b>	Reduced Canada crush and exports
	Oilseed, Soybean	Imports	680	<b>408</b>	<b>-272</b>	Larger supply on increased production

**2020/21 OUTLOOK CHANGES** (All figures are in thousand metric tons)

Country	Commodity	Attribute	Previous	Current	Change	Reason
<b>Argentina</b>	Meal, Sunflowerseed	Exports	650	<b>800</b>	<b>150</b>	Stronger trade to date
<b>Brazil</b>	Meal, Soybean	Exports	17,100	<b>16,630</b>	<b>-470</b>	Final trade number
	Oilseed, Soybean	Exports	82,000	<b>81,650</b>	<b>-350</b>	Final trade number
